THE
WHEELING
INDUSTRIAL EXPANSION
STORY BOARD

The Wheeling Industrial Expansion Story has been *news* in leading publications and read by millions of American businessmen.

As an advertiser, this story is important to you because industrial expansion means new employment — added people — *increased buying power* — obsoleting any market figures published as recently as six months ago.

And the story continues to unfold. For instance . . . when completed, Weirton Steel will have the world's fastest cold reducing Tandem Mill—creating new jobs for its 13,500 employees.

Olin-Mathieson Chemical's 1,100 acre plant, originally planned for annual 60,000 ton capacity, has already expanded to produce 180,000 tons yearly

The advertising medium covering this expanding area *best* is WTRF-TV—far and away the #1 Station in every accepted audience measurement.

As buying power soars—so can your sales soar in this expanding market—if you tell your story to the vast, interested audience on Channel 7.

reaching a market that's reaching new importance!

BROOK TROUT

Salvelinus fontinalis

In Michigan's cold woodland streams, the Brook or Speckled Trout plays hide and seek with anglers. He is gamey, colorful—and dotes on May flies.

Original sketch by conservationist
Charles E. Schafer

Put your money where the people are!

Does your radio advertising talk to trout instead of people? Summer, winter, spring and fall, WWJ's Hi-Fi signal, personalities, music, and news concentrate on the millions of big-earning, big-spending folks in southeastern Michigan to whom WWJ is a constant companion and trusted friend. Use WWJ all day . . . every day.

Hit Your Real Michigan Target

Seventy per cent of Michigan's population commanding 75 per cent of the state's buying power lives within WWJ's daytime primary area.

NBC SPOT SALES, EXCLUSIVE NATIONAL REPRESENTATIVES

NEWSMAKER of the week

Exquisite Form Bras (through Grey Advertising) is planning a \$5 million tv expenditure starting in fall, with \$3.5 million in spot, \$1.5 million in four network spectaculars through the year. This tv campaign, according to Irwin Roseman, Exquisite Form director of advertising and sales promotion, is largest ever planned by a soft goods manufacturer.

The newsmaker: It's always a problem to advertise a bra on tv. But Exquisite Form Bras, which solved the problem in the past, is now planning to go into a fall tv effort of a dimension not dreamed of by soft goods manufacturers in the past. Irwin Roseman, Exquisite top ad executive, announced this week that the firm will be spending \$5 million (through Grey Advertising) on its 52-week tv effort starting in fall.

"Our commercial theme will be the same as it is in magazines: 'In Exquisite Form the lady is you'." Roseman told sponsor. "And there'll be zither music in the background. In effect, we'll be telling women through the live action films 'here's how you look when dressed if you're wearing an Exquisite Form Bra and you've got yourself a guy, too'."

The film commercials will be virtually a transliteration of the magazine ads, thus bypassing any possible continuity acceptance problems. In the commercials, live models wearing the Exquisite Form Bra will always appear fully dressed, and the copy point will be made by implication.

Exquisite Form and Grey Advertising plan to get this message across through varied filmed man-woman situations "in lush, romantic settings that carry the conviction of feminine loveliness and appeal." They'll be playing this theme a minimum four or five times daily, seven days a week on a 52-week basis in at least 90% of the top tv markets in the country.

Says Roseman: "In each market there will be at least one one-minute announcement between 7:30 and 10:00 p.m., with additional ones between 10:00 a.m. and 4:30 p.m. and 7:30 p.m. to midnight. We'll use only network affiliated stations."

Where the network spectaculars are concerned, Exquisite Form still has trial balloons in the air, but expects to anchor firm plans for three fall and one spring show by mid-July. "We do know that we will telecast our spectaculars either Saturday or Sunday night between 9:00 and 10:30 p.m. Our choice of programing is somewhat limited by our product. We're not contemplating any children's fairy tale spectaculars."

Also still up in the air is the lady mistress of ceremonies who'll introduce the commercials and probably deliver them on network. It's said (seriously) that Jayne Mansfield is being considered. ▀

CAPITAL EVENT

On May 2, the cornerstone for WRC-TV's new four million dollar color television plant in Washington, D.C., was officially installed by Vice President Richard M. Nixon and NBC President Robert Sarnoff.

Beginning this Fall, WRC-TV will fulfill the promise in Mr. Sarnoff's dedication remarks: "Soon the nation will be able to see in living color the events, personalities, and scenes of the Capital, and from this added dimension our people will gain a truer picture of the institutions that are part of our national heritage. In a real sense, they will acquire a better picture of their government."

And in the words of Mr. Nixon this was "an historic occasion," for this is the first structure ever built expressly for color. It is also a symbol of WRC-TV's integration with Capital life, and of its continuing service to viewers and advertisers.

The wheels in Detroit are beginning to go around, and it's as happy a sound as spot radio will hear anywhere this summer.

The rush is on to get campaigns started in July and August. For the auto people want to be sure they can sew up the top 50 markets. Not only that—the car makers always tend to jockey around for the earliest feasible announcement deadline, thus will need their air arsenal in readiness.

Ford institutional starts a 26-week campaign in July primarily to pave the way for the new Edsel. The pitch: To identify the newcomer with the company which builds the Ford, Mercury, and Lincoln. Chicago JWT takes possession of the periods for Edsel itself in September.

Other heavy spot buyers will be the Dodge and Plymouth divisions of Chrysler with an eye open for the best franchise.

As a sidelight on the scramble: Watch for the cold remedy boys to advance their buying from August to July to avoid running into clearance problems.

That's already happened network-wise. Groves this week closed for 20 weekly segments on CBS Radio (\$20,000 per week), starting in late September; and NBC Radio got commitments for business worth \$8,000 a week.

Meantime NBC Radio has a bid from one of the Big Three auto companies for any open spots on Monitor in November.

The contract would be for three weekends.

This is the kind of thumbnail success story that gives radio a dramatic lift: Nash Rambler dealers in one day disposed of 135,000 cardboard Mile-a-Dials as a result of nine mentions for the giveaway on Monitor over a weekend.

The promotional gadgets had been gathering dust in dealers' showrooms.

Keynoting all the radio activity shaping up in Detroit is this system of logic voiced by Chrysler executive to a network official:

- Advertising alone doesn't sell cars. Cars tend to sell cars.
- The best prospect is the car owner who is unhappy with what he's got—and what's a better time to cash in on this dissatisfaction than while he's driving?
- So there's no more ideal way to get a car owner to a dealer's showroom than while he's on the road with his radio turned on.

The Petry Company's "crusade" to hypo nighttime spot radio sales by the rate-reduction route is evoking three schools of thought among the reps.

A check by SPONSOR-SCOPE this week found the reps entrenched in these positions:

- 1) Going along with the Petry thesis but limiting rate cuts to stations and markets that show no signs of an early pickup in nighttime business.
- 2) Allowing discounts or combination rates on nighttime spots to advertisers who also are using daytime spots on the same station.
- 3) Standing firm against nighttime reductions on the theory that as more and more advertisers get crowded out of daytime they'll have to buy nighttime at uncut rates.

Kingpin network tv advertisers, like General Foods and P&G, are finding it so tough to spot their brands without running into product conflicts that some admen are predicting:

The time is not far off when the biggies will have to throw away the book on product and brand protection.

Take GF for instance: It's got Instant Coffee which conflicts with Maxwell House's regular brand; Postum which competes with these two as well as Sanka; and Baker's Chocolate which competes with all four. Fitting them into a network schedule rapidly is approaching the impossible.

(See 2 February SPONSOR-SCOPE for pertinent background on this problem.)

Pepsi-Cola is using Monitor this summer basically as a medium to catch people outdoors.

Note this paragraph describing Pepsi-Cola's promotional target in a statement by ad v.p. J. Charles Derrick:

"During the summer, America becomes a nation on the go, with millions of people in cars and small boats, at beaches, at resorts, at home in the backyard. Wherever they go, we want them to think of Pepsi, and we are going with them through the most effective way of reaching this 'nation on the go'—with radio."

If you have a consumer product whose sale depends to a large extent on the housewife's hot little hands, you might just as well face it—either you crash the super markets or drop out of the bigtime. Latest to learn this lesson: The makers of photographic film.

Likely to lead the rush for shelf space is Eastman Kodak, which takes over alternate sponsorship of the Ed Sullivan show 6 October.

Among other competitors, Eastman lately has had a wary eye on Polaroid (successfully using the Steve Allen show).

The Eastman-Sullivan buy involves \$5.5 million annually in time and talent under the aegis of J. Walter Thompson. Though Compton made a strong bid for the Eastman business while this marketing transformation was going on, JWT pulled through to retain its long-standing relationship with the Rochester giant.

P.S.: K&E also pitched the Sullivan show to Eastman.

Items that go into the medicine chest—not beans or steak—are the top profit-takers for the super markets.

Note this breakdown of weekly gross profit per square foot of space as developed in a grocery store study by the C. J. LaRoche agency:

Hair spray & rinses	\$31.80	Butter	\$8.94
Bandages & tapes	21.45	Other dairy products	8.80
Dentifrices	15.96	Tomato soup	7.41

(Headache remedies rate 11th in dollar volume and 5th in total profits.)

The quickening trend to agency mergers—forced in a large measure by clients wanting more services—has a point of rebound in the not too distant future.

Agency management experts think that product conflicts could put the brakes on.

One of these experts predicted to SPONSOR-SCOPE that, because of this limited product scope, the peak in domestic billings any agency will be able to achieve is about \$300 million. BBDO now ranks as the biggest domestic agency with \$200 million.

The big gasoline sponsors won't be able to bring their next year's ad plans into focus until they know the horsepower situation of next year's Detroit models.

It stands to reason that tv would not command such fabulous audiences if its programs were slanted toward particular audiences. The statistical proof of the pudding is that there aren't any really drastic listening differences by region, urban-rural population, or even income and education.

True, men-women-children preferences do exist. But aside from that, there seems to be only one other factor of major consequence—age.

NBC TV told SPONSOR-SCOPE this week that it has been doing quite a bit of probing in this direction on a continuing basis. And much of it is concentrated on the appeals that tingle the younger and the older housewives.

Here is how NBC TV found the homebodies divide their loyalties for some of the bigger shows, by age groups:

YOUNGER HOUSEWIVES

Robert Cummings show
I've Got a Question
Playhouse 90
Steve Allen
Draguet
Margie
Matinee Theatre
Gunsmoke

OLDER HOUSEWIVES

\$64,000 question
Burns & Allen
Groucho Marx
Arthur Godfrey
Ed Sullivan
Lawrence Welk
Ralph Edwards
Hit Parade

Here's one big reason for Colgate's indecision about continuing with *The Big Payoff* and *Strike It Rich*: It wants to make sure that its daytime tv fare is well distributed in appeal among the younger and older housewives.

In cost-per-1,000 these two shows consistently have rated among the lowest (at one time the figure was around 90¢ per-1,000-homes-per-commercial-minute). Age-appeal now is the question.

NBC TV's sales developers have come to the conclusion that the women's service program is kaput as a sponsor lure.

Here are their observations:

- The cost of tv makes it mandatory for the advertiser to set his sights for a mass audience that will drop its chores to look at the screen.
- Minority-interest groups are too expensive to cater to.
- Not enough women look to tv for self-improvement. They prefer to be entertained by the medium.

As the tv networks try to build up their teen-age audiences with pop musical shows, radio is heading in another direction—toward more drama.

RCA Thesaurus reports that sales of transcribed soaps, adventures, and mysteries have gone up around 300% the past year.

Other radio program transcribers (like World, Goodman, and Michaelson) give a similar picture.

(For an analysis of this trend see the spot radio section of SPONSOR's July Tv and Radio Basics. For why SPONSOR's annual has changed name—from Fall Facts Basics—see editorial, page 84.)

In terms of total sponsored hours per month at night, the trend toward alternating and participating sponsorship on the tv networks slowed down slightly the past season (though it's still a lusty force).

A Nielsen compilation of the hours occupied by alternating and participating sponsors vs. full sponsorship gives these ratios:

SPRING 1955

31%

SPRING 1956

42%

SPRING 1957

43%

Chicago ad agencies have found a pleasant and profitable occupation for the physically handicapped: Monitoring their spots on radio stations.

The recruiting is done through state agencies.

Several major tv film producers have an answer to Madison Avenue's cynical question "What's the good of pilots?"

The reply "We're eliminating them."

Here's how these companies will be showcasing their future product:

CALIFORNIA NATIONAL (RCA subsidiary): Will produce a "prototype," telling about star, theme, writers, director, etc., running about eight minutes. After the capsule has been exhibited to prospects, the actual series will go into production. With or without an order, 39 will be made.

RKO-TELERADIO: Each proposed series will be put under the motivational researcher's microscope and the analysis submitted to prospects along with 39 scripts.

SCREEN GEMS: Will sell from a visual presentation, including 10 minutes of film giving the essence of the show, and 39 story outlines.

GUILD: Intends to focus the sales pitch strictly on performance records: company, producer, writer, star, and how similar material has been received in the past.

(See Why Admen Deprecate Value of Pilots 11 May, SPONSOR-SCOPE, page 11.)

Another tv network v.p. this week took the long trek to see Henry J. Kaiser in Honolulu: ABC TV's Ollie Treyz.

The mission: Salvaging something out of the Sunday night film feature deal which recently blew up when not enough good product could be scrounged.

Y&R, Kaiser's agency, thinks he's gone out with a print of *Maverick* (western).

The trend toward simplifying the buying of spot is taking definite shape.

The first draft of a form which would serve both as confirmation and an order has been worked out between the SRA and the Four A's.

It's all part of the push by seller and buyer to reduce the ever-increasing tonnage of paperwork.

NBC Radio has sold the first network-created radio documentary in years: *Life Around the World*.

It will be a quarter-hour strip across the board after 7:45 p.m. *Life Magazine* will participate two ways: As supplier of editorial matter and as participating client. The deal is via Y&R.

CBS TV Spot Sales is putting its promotional guns to work to combat the impression that open prime spots are hard to find on its stations. The pitch:

- 1) Among its four top-market stations, out of a total of 164 AA breaks 100 turned over at least once a week. Average turnover was at least 2.0 times.
- 2) You can get weekly bulletins showing open spots and ratings.

Rather than create a ticklish situation with its Dorothy Gray account, McCann-Erickson this week abruptly called off a pitch that was to be made in behalf of its subsidiary, Marschalk & Pratt.

The opportunity it thereby passed up: Woodbury-Jergens.

For other news coverage in this issue, see Newsmaker of the Week, page 5; New and Renew, page 57; Spot Buys, page 62; News and Idea Wrap-Up, page 64; Washington Week, page 73; SPONSOR Hears, page 76; and Tv and Radio Newsmakers, page 82.

WHEN KANSAS CITY GOES SHOPPING . . .

It's a WHB world

FOOD . . .

More national food product advertising is placed on WHB than on all other local radio stations combined. And locally, virtually all major food chains advertise consistently on WHB.

DRUGS . . .

National drug advertisers and local drug stores spend more money on WHB than on all other local radio stations combined.

AUTOMOTIVE . . .

WHB carries schedules for every major national automobile advertiser. Local car dealers buy more time on WHB than on all other local radio stations combined.

CIGARETTES . . .

Every cigarette brand buying spot radio in Kansas City in 1956 bought WHB.

NEW HOMES . . .

Kansas City home builders put more new-home advertising on WHB than any other Kansas City radio station.

. . . and **IT'S A WHB AUDIENCE . . .**

Whether it be *Metro Pulse*, Nielsen, Trendex or Hooper—whether it be *Arca Nielsen* or *Pulse*—WHB is the dominant first among every important audience-type. That statement embraces the housewife, her husband, their teenagers—as well as the farm family. *Every* survey agrees. Whether it's *audience* or *advertising* it's a WHB world! Talk to Blair or WHB GM George W. Armstrong.

Why
all
the
fireworks
?

Maybe you heard them too—the sound and fury of claims about new programs that were supposed to blow New York viewing habits sky-high.

Well, the smoke is settling now. Let's see what actually has happened:

WCBS-TV's share of total viewing is greater than at any time in the past two years!... WCBS-TV leads the second-place station by 52%—the third station by 183%!... WCBS-TV shows a larger audience gain than any other station in the past year!... WCBS-TV leads in every hour of the day but one, from 8 am straight through to sign-off!

It takes day-in, day-out showmanship to win *and hold* attention in television's biggest market. To its superb schedule of CBS Television Network programs, WCBS-TV adds a dazzling array of *local* entertainment and public affairs programs, including *all five* of the top-rated local participating programs, and *four of the top five* daily news programs in all New York television.

Naturally, more national advertisers buy the station that attracts the biggest audience most of the time.

In Greenville, Mississippi WGVM
is No. 1 in Hooper and Nielsen

Timebuyers at work

Norman Baer, director of radio-tv. Lewin, Williams & Saylor, Inc., New York, says: "I've noticed lately the increased popularity of a closed-circuit industry show I call 'Musical Chairs'. I'm referring to the ever increasing changes among reps and salesmen. Looking at my list of a year ago compared to today's men who call on me, I find few of the same men representing the same companies. In one instance I notice that six men have called on me from the same company within 11 months. I was getting so worried about these changes, I thought something must be wrong with me and I very carefully investigated my soap and toothpaste, but found them all to be irreproachable and completely blameless. Nevertheless, salesmen left me in the midst of obtaining availabilities and data and failed to mention the negotiations to their successors. A great deal of confusion resulted and often buys didn't go through because of the delays. I realize that this is not a new situation and we'll always have to live with it in our business, but I think it's reaching the point where it's a major problem to the buyer-seller circuit and the reps should take a good hard look."

Gary Pranzo, Cunningham & Walsh, New York, timebuyer for Brisk and Super Suds, feels that "merchandising isn't a primary consideration, but all things being equal it can play a decisive part." The most important merchandising service, he thinks, is placing store displays. "Here, the station's standing in the community and the

impact of its advertising can be the key to its merchandising. For they must sell the merchant on the value of your particular store display to his cash register. This isn't easy. Store space is usually limited and competition for space is severe. Literally hundreds of other sales and promotion men are trying to secure the same space for their displays. The station's merchandising force must show why your store display should be given

preference. It must point out the relation of its advertising to the merchant's store display; that its advertising initiates the sale—helping to bring attention to the product, and creating desire and belief in it—and that the store display consummates the sale as a visual salesman who reminds the consumer to buy the merchandise. Thus, it becomes a strong sales weapon when properly placed in stores."

A fat year for tv film companies

There are all kinds of continuing indications that the telefilm business is heading into its biggest season (1957-1958). Around the Hollywood lots production is booming at an unprecedented pace. The network fall schedules show more film programs (as opposed to live) than at any time since video's beginning. On the latter score an ad run recently by Screen Gems served to highlight the web usage of filmed shows. The Screen Gems copy made the point that each week 2,558 Screen Gems shows are televised in the nation's 100 top cities.

And the ad listed 10 programs currently showing or about to show on one or another of the three tv networks. Of these *Father Knows Best*, *Mystery Theatre* and *The Web* are programed via NBC; *Ford Theatre*, *Circus Boy*, *Adventures of Rin Tin Tin*, and *Wild Bill Hickock* play the ABC airwaves; and *Hickock* and *Playhouse 90* grace CBS' channels. *Captain Midnight*, of course, runs national spot, and *Tales of the Texas Rangers* will go network but hasn't been set yet.

Almost every day another American made tv film series is sold in another foreign country. More and more the foreign market looms as a big additional profit potential for the right kind of film.

Stations will share production cost

Financial activities also indicate the thriving state of the industry. As an example, National Telefilm Associates' nine-month statement (for the period ending 30 April) shows more than a 300% increase over the equivalent three-quarter period a year ago, with a \$818,592 net for the last nine months as against a \$191,397 net for the same time last year. NTA claims to have exhibitor contracts for its product to the extent of \$12,346,041 dollars. For the equivalent time a year ago such contracts totaled about \$3,500,000. Other recent telefilm statements have been healthy too.

And a somewhat unusual new arrangement was concluded in the tv film field, just about the time this piece was being written. Four Westinghouse tv stations (KYW-TV, Cleveland; KDKA-TV, Pittsburgh; WBZ-TV, Boston and KPIX, San Francisco) and two independents (WPIX, New York and KTTV, Los Angeles) have made a deal with the aforementioned Screen Gems to share in the production and distribution of a new tv film series, called *Casey Jones*.

The stations will pay part of the production costs and share in the profits (if any) of the series. Each of them is renting the series on the usual syndication basis for its own market, and the series is then being made available for markets in the rest of the country on a local and regional basis. If this works out there doesn't seem to be any reason why other stations around the country may not go into similar producing and distributing partnerships with other film firms.

Increasingly interesting to watch is the accelerated activity in the fee tv phase of the business. We carried on at considerable length

in our last column on the subject, with some detail concerning the Video Independent Theatre operation in Oklahoma. Some additional interesting facts have been revealed concerning this operation. For instance, while VIT has no intention of carrying commercials in that phase of their program which shows first run or re-runs of feature films, they do anticipate carrying commercials in another phase of their programming, a strip dealing with news, weather, time and music. The Oklahomans have already discussed their project with many Hollywood film producers and distributors and claim that the Hollywood folk were very much interested in supplying product to the VIT operation.

As this is being written the sixth annual Convention of the National Community Television Association has just about concluded in Pittsburgh. Reports from the Convention indicate that the approximately 350 community television system operators attending were very bullish on the fairly immediate prospects of the introduction and rapid growth of wired fee television.

Fee tv convention in Pittsburgh

Two key speakers at the convention were Carl Leserman of International Telemeter Corp. and Milton Shapp of Jerrold Electronics Corp., one of the leading manufacturers of community antenna equipment. ITC, of course, is the fee tv system whereby a coin box is attached to the television set, and the viewer inserts a coin or coins to unscramble the signal on a given program. Shapp made an all-out pitch for fee tv via closed circuit wires, while Leserman indicated that in his view either broadcast fee tv or closed circuit would be acceptable. Shapp told the group that it was his belief that broadcast fee tv would not go, and that the only sound way for fee television to operate was via closed circuit.

High on the discussion agenda, both on and off the official speaker's platform was the Video Independent Theatres project discussed here last week, and above. It was the consensus that the Bartlesville experiment was highly important to the assembled operators. If the experiment is successful there seems to be every possibility that other community antenna operators will join with theatrical exhibitors to set up similar enterprises.

Everybody, it seems, is hustling into the fee tv act. Both Zenith and CBS, on opposite sides of the fee tv fence, made it their business to make their respective pitches before the General Federation of Women's Clubs convention in Asheville, N. C., last week. The situation seemed a little confused, but the general feeling is that the ladies are lining up against fee tv, at least as a broadcast service.

Sen. Strom Thurmond, Democrat of South Carolina, introduced a bill in the Senate, which would prohibit charging a fee for home tv. The bill was similar to one introduced in the House earlier in the year by Rep. Emanuel Celler. And in New York, a gent we've never heard of before, named Max Kantor wired Horace Stoneham of the New York Giants and Walter O'Malley of the Brooklyn Dodgers \$5,000,000 each for a season's fee tv rights to their respective team's ball games. Kantor called a press conference in town to reveal his wired offer because the ball moguls ignored him. Said his company was a newly formed closed-circuit tv company called ITV, Inc.

Don't know where this is all leading, but with such large billows of smoke floating about a blaze is likely to erupt somewhere. It will be interesting to watch.

SOME
PEOPLE
NEVER
LEARN!

"Once bitten, twice shy," goes the old saw. But every year, Summer's bright promise puts a silencer on the maxims. And all over again, forgetful baseball fans are firmly convinced that their seventh-place stalwarts are a shoo-in for the pennant.

In television, it's a sure sign of Summer when the talk in the trade press is all about Fall. A favorite theme, of course, is always the unprecedented variety of programs waiting in the wings. Programs skillfully designed to please all tastes, all ages. Westerns! Mysteries! Comedies! Adventures! They're all *coming*—all you have to do is wait till Fall.

However, more and more local and regional advertisers are learning they don't have to deal in futures. Variety and balance of programs? That's exactly what non-network advertisers have had to choose from, and *can* choose from *right now*, in the CNP catalogue of prime syndicated TV film products. Variety and balance like this:

The crunchy goodness of charter-boat adventure in rolling Caribbean waters.
The toothsome hilarity of a landlocked Water Commissioner's misadventures.
Gripping episodes of undercover espionage with a real bird of a secret agent.
Blazing six-gun action by a thunder-browed Marshal with a lightning draw.
Spine-tingling tales with chilling plots that always hinge on narrow squeaks.
Stirring stories of pioneers whose exploits set Conestoga tongues to waggin'.
Smashing dramas of police versus underworld that prove those prison cells are busting up that old gang of crime.

This, as they say, is only a partial listing. To give you a clearer idea: In New York City alone, 14 different CNP shows are currently being programmed every week.

Want a real run for your money? Or a profitable *re-run* for your money? We probably have exactly the program type you're looking for. Not "coming next Fall," but now. Don't phone, wire or write. One of our sales representatives will call on you in the near future. If he doesn't, let us know.

Women's week

Lady ad manager for Lady Esther: Kay Reed, who's something of a walking ad for cosmetics, has just been appointed advertising manager of Lady Esther (division of Chemway Corp. of Chicago) by Milton S. Samuels, general manager of the company.

Before joining the 35-year-old cosmetics firm, Kay was an agency account executive for various cosmetics products. She also traveled throughout the Southwest as beauty and fashion coordinator for industrial relations firms.

"Times have changed radically in the beauty-fashion field," she told SPONSOR. "We've just launched a new Lady Esther Dry Skin Cream and are test-marketing it with radio announcements in several markets, through our agency, Donahue & Coe. Now in the old days women worried about dry skin in winter only. But we expect to have them talking about 'drychosis,' our term for dry skin, by fall and use this cream as a year-'round aid."

While radio has not been traditionally used as extensively as tv and magazines for selling face creams, Kay feels that today's women are sufficiently "sophisticated about beauty care to form their own image from spoken copy alone." If the test campaign is successful, Lady Esther plans to use spot radio extensively by fall to open up national distribution on a market-by-market basis.

Kay, who's a slim tall blond with a model's shape, will be lecturing to teen-agers on beauty care throughout the country this fall.

"I should know about teen-agers," she told SPONSOR. "I've got a teen-age daughter who's married and lives in Japan at the moment with her G.I. dentist husband."

AWRT group reports on Venezuela: The four AWRT ambassadors to Venezuela (courtesy of the Creole Petroleum Corp.) returned from a one-week tour of the country on 16 June.

At a cocktail reception in New York's Park Lane Hotel, Edythe Fern Melrose, president of AWRT and WXYZ and WXYZ-TV, Detroit, personality, spoke enthusiastically about the Venezuelan economy and culture.

"This is a nation racing toward its destiny which seems inevitably one of greatness," she said. "I was particularly impressed with the tremendous amount of construction work that is evident everywhere, and with the advanced architectural concept of the Venezuelans."

Vacationers might note the comments of Helen Hall, NBC Monitor correspondent, who "loved the modern homes, built around patios and designed for functional living; the widespread use of modern equipment like deep freezers, washing machines and other appliances."

And, career gals with a yen for Latin America might note that Venezuelan women are assuming many important government and industry jobs as well as rising to prominence in professions.

The other two AWRT returning wanderers are Edna Lizbeth Freeman of WFBC, Greenville, S. C., and Fran Riley, Ted Bates radio-tv publicist.

Most
honorable
report:
Miami prefer
"Destination
Tokyo"

Miamians had a choice of two trips to Tokyo one recent Sunday night from 10:00 to 12:30. Station WTVJ showed Warner Bros.' "Destination Tokyo", starring Cary Grant and John Garfield, while WCKT had MGM's "Thirty Seconds Over Tokyo", starring Spencer Tracy and Van Johnson.

Results: a 25.4 ARB rating for the Warner Bros. film distributed by A.A.P.; a 9.1 rating for the other Tokyo story, shown during the same time period.

This kind of pulling power for Warner Bros. features is being repeated in market after market from coast to coast. For rates and availabilities, write, wire or phone

* RORABAUGH & BROADCAST ADVERTISER REPORTS

49th and Madison

An early start

I was pleased on inspecting the picture page in the 8 July issue to find our group. It is surprising that we look reasonably wide awake at such an early hour. We had always had trouble in getting a big turnout at the cocktail hour or luncheon hour but we were agreeably surprised at how popular with the businessmen the breakfast hour was as we got a very satisfactory attendance.

Campbell Arnoux, *president*
WTAR Corp., Norfolk

● Reader Arnoux refers to SPONSOR's new picture page feature, Picture Wrap-Up, which appears on page 66 this issue.

Pulse all-media study

Your article on Pulse's new media measuring system raises certain questions about research techniques.

Pulse with its so-called "single yardstick for all media" has, in my opinion, made a significant contribution in the area of inter-media studies. Pulse has placed the cost-per-1,000 comparison between newspapers and radio and television on a more realistic basis than any generally-publicized effort to date.

The basic concepts behind the "yardstick" are imaginative and sound. However, some of the research techniques used seem to need to be refined before a truly precise comparison between print and broadcast costs-per-1,000 is possible.

In the area of media selection, Pulse has made a contribution that is of quite apparent importance: that of reducing newspaper-broadcast comparisons to the common denominator: what it costs in each medium to reach 1% of homes in a market. The means is thus provided for cutting through a vast amount of promotional hocus-focus in both broadcast and print media measurement. In so providing, Pulse has registered two important points: one is the likelihood that the typical number of newspaper ad-readers probably comes much closer to the typical number of broadcast commercial viewers or listeners than has been generally supposed to be the case. The

second is the likelihood that the typical cost of reaching a given percentage of people in a market with a newspaper ad is probably many times greater than that of reaching the same percentage of people with a radio commercial, and several times greater than with a television commercial.

I think it can fairly be said in making its recent comparison studies, Pulse tried to lean over backwards to give newspapers the benefit of the doubt. Even so, the difference in cost-per-person reached by newspaper ads and in cost-per-person reached by broadcast commercials is too startling to be passed off as an error in measurement. Given costs-per-ad reader for newspapers, that are as much as 40 times as high as those per commercial listener in radio and 15 times as high as those per commercial viewer in television, there is no question but that a drastic reappraisal of formerly accepted media cost-per-1,000 "rules of thumb" is indicated.

The Pulse-developed concepts and findings noted above are impressive. However, while many of the research techniques used in conjunction with those concepts and findings meet desired standards, some few might be improved, if truly precise comparisons are the ultimate goal. For one thing, to interview every member of the family present in a home probably produces less accurate information as to each person's level of readership or listenership than to interview only one person per family.

A more important problem is that the method thus far employed by Pulse for obtaining print ad remembrance is intrinsically different from that used to obtain broadcast commercial remembrance. For newspaper ad remembrance, an actual copy of yesterday's newspaper is leafed through with the respondent as he indicates the ads he "remembers." On the other hand, for broadcast commercial remembrance, a list of the brand names is shown the respondent and he then indicates which he "remembers" hearing or seeing. Obviously, the two devices, the actual newspaper and a brand list offer considerably different levels of help to the respondent.

However, Pulse has experimented further. The experimental devices Pulse has mentioned: frames to help

49TH & MADISON *continued . . .*

identify a television commercial and jingles, etc. to help identify a radio commercial are intriguing because they seem to offer promise of eventually establishing more truly comparable print-ad and broadcast-commercial remembrance techniques.

A final point to put the above remarks about refining research techniques in their proper perspective. Such changes as I have suggested probably would not materially alter the relationships Pulse found between newspapers and broadcast media.

Summing up my comments, the Pulse "single yardstick" establishes new and important relationships between newspaper and broadcast costs. The yardstick's concepts are basically sound but its research techniques could be made more precise if it is to provide the most comparable print/broadcast measurements possible.

Harry Smith,
director radio-tv research
N. W. Ayer & Son, New York

• Reader Smith's comments refer to the article "Found, an all-media yardstick" in the 25 May issue and last issue's Sponsor Asks, "What is your reaction to Pulse's new all-media yardstick?"

Art director awards

Our studio was pleased to see the mention accorded as winner of the New York Art Directors Club Medal, on page 46 of SPONSOR for 18 May 1957.

However, I'm sure that someone else has pointed out the caption switch between the Lincoln and Ford medal winners.

Actually Bill Melendez was the art director for the commercial; Chris Jenkyns and Sterling Sturtevant, layout and design; and Bill Littlejohn, the animator. Of course the agency for whom the commercial was created was J. Walter Thompson Co., of New York.

George W. Woolery

TIMEBUYERS

RATE THE REPS

SPONSOR survey finds wide agreement on which rep firms do the best job. Buyers consider delivery of "fast and thorough availabilities" most important aspect of rep service. "Data-in-depth" rated the least vital

A SPONSOR survey of timebuyers in New York and Chicago, just completed, for the first time provides answers to these questions about the performance of station representatives:

- Is there an elite group of representatives, recognized as superior in selling and servicing?
- How far ahead are the leaders?
- Are leading representative firms uniformly outstanding in all aspects of selling and servicing?
- What do timebuyers feel reps should do to improve service?

SPONSOR's survey was conducted by mail in June. Questionnaires went to 250 buyers in New York and Chicago at agencies known to be highly active in spot buying.

As an index of the interest in the subject among buyers themselves, 24% of those surveyed returned questionnaires. This is an extremely high return since the questionnaire asked buyers to: (1) list five rep firms in the order of their performance for five categories of service; (2) rank each of these categories of service in order of importance; and (3) suggest improvements. A total of 60 buyers answered.

Timebuyers want more creative selling from reps—but they want it fast and before they start buying. The big plea: make avails clear, complete

Some 33 buyers from 24 different agencies signed questionnaires (though they were not required to do so). Thus at least 24 different agencies are represented in the returns and the probability is the number is considerably higher since the original mailing went to 70 different agencies.

The survey demonstrates that leaders in the representative field are far out in front of their competitors. As a glance at the charts at right will show, the same five representative firms ranked among the top five for each of five categories of performance. This was so despite the fact that buyers were definitive in filling out the questionnaires—and did not merely repeat the same names in the same order for each category.

A total of 31 representative firms in all were mentioned.

In written comments, buyers pointed out that the fact a firm was not ranked near the top did not mean individual salesmen for that firm might not be outstanding. Some buyers who ranked certain firms high did so because as they pointed out, "my salesman" from that firm is tops. Buyers said, too, that cooperation from the stations a firm represents is all-important in determining whether the firm's salesmen can do a good job. If the stations don't come through with the facts, the salesmen can't look good in front of the buyer.

Some buyers said flatly, their ranking was influenced by quality of stations represented. The better the station, they said, the better the liaison with the rep.

SPONSOR asked timebuyers to state which of the five categories of service are most important to them: day-in, day-out selling; providing fast availabilities; providing thorough availabilities data; in-depth market and other data; follow-through after the buy.

Fast availabilities and thorough availabilities were tied as number one, with 166 points each. Day-in, day-out selling was third with 129 points; follow-through was fourth with 109; in-depth data was fifth with 89.

The point system worked this way (both for ranking of the rep firms and of performance categories):

Each number one vote counted five points; number two counted four; and so on down to number five which counted as one point.

The five categories of rep service were then graded as to their relative value in the esteem of the buyers. In-depth data with 89 points was set at a value of "1" and the other categories graded in ratio.

The purpose of this grading was to find the real value of each point scored under the different categories. Obviously, if buyers consider fast and thor-

ough availabilities more important than in-depth data, then these categories should be given more weight.

By this grading, each point scored under the "availabilities" categories was worth 1.87: "day-in, day-out selling" was weighted at 1.45 per point; "follow-through" at 1.22; and "in-depth data" at 1.00 (see chart bottom this page).

These "values per point" were multiplied against the "raw scores" in the charts at right to achieve the "weighted scores" shown.

Stripped of technicality, the real meaning of the charts is:

► that a few reps are way out in front;

► that even these reps are not equally good in all facets of their operation;

► and that there's real need for the majority of firms in the rep field to improve their operations.

SPONSOR asked buyers to suggest the way. From among 50 written suggestions, here are a number which best sum up the views of buyers.

A lady buyer from a major agency in Chicago wrote what was probably the most forceful and all-embracing comment:

"1. Make appointments. Don't all jam in at once expecting time for full presentations at what may be our busiest moment.

"2. Realize that when a buyer is actually 'buying' time for a campaign, he or she is busiest. Give us a chance to do the buying by avoiding unnecessary follow-up calls. If the avails are *thorough, written out* and the market data is attached, any good buyer can do the rest. Reps only build up personal resentment with inane remarks such as: 'What's new on _____?' (deep sigh)."

"The prying questions are childish—as if we were their deep dark buddies who'd share all secrets. (Having just been through buying a campaign, I guess I'm blowing off steam. But salesmanship is one thing—nuisance value quite another.)"

"3. Reps should fill you in on strong market points at times when you are not busy buying. But they should only brief you on a market if they know a specific account *is, was, or is likely* to be interested in that market. Who cares about Yippahoo-pee-burg if the clients aren't there?"

"4. No sour grapes routine after losing a buy. An honest loss shouldn't (Please turn to page 78)

What aspects of rep service are most important?

	Score*	Value**
1. Providing availabilities fast	166	1.87
1. Providing thorough availabilities	166	1.87
3. Day-in, day-out selling	129	1.45
4. Follow-through after the buy	109	1.22
5. In-depth market and other data	89	1.00

*A first place "vote" equaled five points and so on down to fifth place which equaled one (see text). **The last-ranking category was given a value of "1" and the others rated accordingly. "Raw scores" in charts were multiplied by "values" to get "weighted scores."

Timebuyers rated rep firms on five categories of performance

Tabulated below are results of a SPONSOR survey of timebuyers in New York and Chicago. Questionnaires went to 250 buyers in 70 agencies. A total of 60 buyers (24%) returned questionnaires; seven, however, arrived too late for tabulation so that figures below represent results for 53 questionnaires (21%). Inspection showed, however, that the seven late arriving questionnaires did not significantly alter the tabulated figures. At least 24 agencies are represented in the returns below and the probability is that the

figure is much higher (see text). The questionnaire itself asked buyers to list the five representative firms which do the best job for each of five categories of performance.

Each time a rep firm was voted number 1, it received five points; a number 2 ranking was worth four points; number 3, three points and so on down to one point for number 5. The totals each firm received under this point system are shown under heading "raw score." For explanation of "weighted score" see chart and caption on opposite page.

I. Which five representative firms do the best day-in, day-out selling job?

	Raw Score	Weighted Score
1. Rep A	161	233
2. Rep B	140	203
3. Rep C	107	165
4. Rep D	91	132
5. Rep E	56	81

II. Which representative firms provide availabilities fastest?

	Raw Score	Weighted Score
1. Rep A	142	266
2. Rep B	92	172
3. Rep C	87	163
4. Rep D	80	150
5. Rep E	63	118

III. Which reps provide the most thorough availability information?

	Raw Score	Weighted Score
1. Rep A	149	279
2. Rep C	127	238
3. Rep B	126	236
4. Rep D	70	131
5. Rep E	55	103

IV. Which reps provide the best market and other in-depth data?

	Raw Score	Weighted Score
1. Rep C	138	138
2. Rep B	126	126
3. Rep A	112	112
4. Rep D	64	64
5. Rep E	53	53

V. Which reps do the best follow-through job after the buy is made?

	Raw Score	Weighted Score
1. Rep A	132	162
2. Rep B	118	144
3. Rep C	94	116
4. Rep D	91	111

4. Rep D	396	588
5. Rep E	287	428

A COPY CHIEF LOOKS AT RADIO

David B. McCall of Ogilvy, Benson & Mather

says radio today must use attention-snaring devices.

Old mellifluous-voiced announcer is now obsolete

David B. McCall

This is Dave McCall's first article for SPONSOR. Dave joined Ogilvy, Benson & Mather in 1951 as a copywriter and in 1953 went to the David J. Mahoney agency as v.p. and creative director. Back with OBM as associate copy chief since 1956, McCall supervises many of the OBM accounts used here as examples.

No medium has changed so radically and been studied so sparingly in the last 20 years as radio. And yet this despised, misunderstood medium offers enormous returns for relatively small investments—if it is used properly.

In days of yore—pre-television—radio was a giant among salesmen. Sponsors lined up patiently, waiting for one of the great networks to allow them to spend money on one of the top shows. Programing was the *sine qua non*—and many agencies created their own shows. The entire country could be found tuning in on such shows as Jack Benny, Charlie McCarthy and Bob Hope. Franklin Roosevelt solidified his hold on the American public through the medium of radio.

Them days are gone forever. Radio, in its halcyon days, was a primary

medium. People tuned in to *listen* to a show and to hear every word that was spoken on it. There was a respectful silence in the living room when the radio was on. Commercials could be low-key, well-bred, soft-spoken, subtle, beautifully orchestrated.

Today, radio is a very different dish of tea. First, a clock radio wakes a family up and it stays tuned while the family prepares for its day. The radio is on while a man shaves—and a good commercial must penetrate through the sound of running water and into a mind that is not consciously listening. The radio is on through breakfast. The radio is on while a housewife works. The car radio is on when a commuter drives to the station or to his job. The portable radio is on at beaches and during family picnics. In fact, the radio is on most of the day—but its listeners are engaged in a thou-

ENGLISH ACCENT

Schweppes Tonic is one of the few foreign products that has been successfully marketed on a large scale in America. Since radio was used from the beginning. All commercials feature the voice of Commander Whitehead. His unusual and distinguished British accent is as "ear-catching" as his beard is "eye-catching." Radio spots by the Commander in "ad lib" conversation with characteristic regional American voices.

sand activities that are more important than merely listening to a radio commercial *unless they are forced to*. Something—a jingle, a sound effect, a unique voice—must trigger the minds of radio's semi-conscious listeners into complete attention.

The pattern of radio programing on the most successful stations of today is instructive. The giant networks are no longer the powers of modern radio. The aggressive independent stations have stolen the show. How did they do it? With music-and-news programing in every case. Disk jockeys in various forms have become the new emperors of radio. Pop disk jockeys like Jerry Marshall . . . rock and roll disk jockeys like Alan Freed . . . funny disk jockeys like Klaven and Finch. These men, who play endless variations on the theme of *the 10 top tunes of the week*, are listened to by as many

POP SONG JINGLE

New filter **Spud** is presently being introduced with more than 300 radio spots a week in several major metropolitan markets. Heading the campaign is a musical jingle. Just the name's the same, boys . . . Spud is new!" based on the melody, "I'll put the blame on Mame," a song popularized by Rita Hayworth in the movie "Gilda." Spud cigarettes are lightly mentholated and are a product of Philip Morris, Inc.

NO TWO ALIKE

Dove Bath and Toilet Bar used radio as a secondary medium in its New York debut. But rather than the customary method of selecting one commercial and repeating it at high frequency, it was decided to use as many different and highly unusual radio spots as possible. This program of 20 completely different commercials over a two-week period brought considerable comment and word-of-mouth assistance for the product.

LOCAL STAR SINGS

Good Luck's spot radio efforts are mainly in Southern markets. Whenever possible, the agency tries to have the commercials delivered (or sung) by a local radio personality. The bulk of the campaign consists of 10-second commercials; a six-second jingle and four seconds of sell (a single sentence delivered by the announcer). These spots have the advantages of low cost, a jingle and local personality endorsement.

people as listened to the great stars in the days of the Thirties.

But people listen in a different way today—and commercials to be effective must be written with a clear understanding of modern audience habits. They must be loud, clear and simple. Above all simple. Take the jingle, for example. The jingle is the most important factor in a successful modern radio commercial. It is the spearhead in the commercial's effort to penetrate. It must convert *passive* radio listeners into *active* commercial listeners.

Listen to WNEW—the most successful modern radio station in New York City—and you will hear most of the selling jingles on the air today. What kind of tunes do they have? They may be public domain tunes and they may be original—but the good ones are all straight and simple, almost child-like.

We try to follow this example for Ogilvy, Benson & Mather clients. For example, we chose *London Bridge is Falling Down* for Tetley Tea; *Da Camptown Races* for Good Luck Margarine; *Put the Blame on Mame* for New Filter Spud Cigarettes and a basic calypso rhythm for Dove.

Perhaps a good thing to remember when choosing or writing a jingle tune is that Motorola's *Happy Birthday to You* was one of the all-time great spots.

One frequent fault of jingles is over-

ARTICLE IN BRIEF

New radio is a companion listening medium. The listener is usually doing something while the radio is on. The radio commercial must trigger him into attention. Jingles, sound effects, off-beat voices are efficient methods when backed with high frequency schedule.

production. It is often possible to accomplish more with a small combination of carefully chosen instruments than with a full orchestra. And one unique voice can be infinitely more memorable—as well as clearer—than a cumbersome choral group.

The words that fit good jingles are as simple as the tunes. A good jingle lyric should state your major selling message in its clearest, most concise form. There's nothing complicated or subtle about "You'll wonder where the yellow went when you brush your teeth with Pepsodent."

Repulsive, said the cognoscenti, when this commercial first appeared. But the very bluntness which offended some people made this commercial great for radio.

A really good sound effect can do an effective job of penetrating to the lis-

(Please turn page)

COMEDY MONOLOGUE

Pepperidge Farm has been receiving fan mail about its magnificent bread for years. Now Pepperidge Farm's advertising gets its own fan mail. Listeners actually write to say how funny and entertaining they find the Titus monologues about "Maggie Rudkin and her bakery." Actually these commercials, although entertaining are extremely hard-sell. They all tell a strong ingredient story for farm-fresh Pepperidge bread.

tener's conscious mind. The Pepperidge Farm Bread commercials are punctuated with the sounds of a farm: the moo of a cow, the buzzing of the bees, the clatter of a Model T, etc. Every Schweppes spot opens with the nautical sound of two bells. The sound effect can both attract initial attention—and maintain interest throughout a commercial. A vice president of the National City Bank in New York was so fascinated by the Pepperidge Farm commercials that he asked for a complete record of them to play at his own convenience.

The announcer's voice is a vital factor in an effective commercial today. The faultless, sonorous voices of the Thirties should be avoided like the plague. A commercial writer should presume that his listener is running a vacuum cleaner while babies cry and dogs bark. Melodious tones simply are not designed to beat this kind of competition. But the removal of the typical announcer's voice from consideration still leaves a vast number of voices

VOICE QUALITY

The **Tetley Tea** commercial combines a musical lyric and a straight announcement delivered in a friendly but authoritative manner. The girl singer's voice was chosen because it is unusual and memorable. The announcer was specifically picked because his voice combined pleasing quality with an ability to sell. He is definitely not "Madison Avenue," but rather sounds solid and convincingly familiar with the product.

ROCK 'N' ROLL

Thom Mc An shoes singing commercial for the illustrated model (Snap Jacks) ran last fall in 11 cities on 23 programs. Only rock-and-roll programs were used and commercials were slotted about every 25 minutes on each show. In preparation is a series of radio commercials to assist in the introduction of Mr. Thom Mc An, the company's new symbol, a rather dignified but also highly personable real Scotsman

McCall's tips on radio copy today

Get attention: radio is a secondary listening medium. The audience is usually doing something else while listening. A commercial must trigger the listener into complete attention so that the message is heard and retained.

Devices: the jingle and the sound effect are two most efficient ways to force listener attention. Jingles must be loud, clear and simple, almost child-like in their directness and yet contain the complete sales message.

Voice quality: announcer's voice should be off-beat (not those melodious tones of yesterday) and should end commercial on an up-beat by repetition of the jingle or sound effect. Commercial should not be allowed to fade out.

Stop drag: commercial should be kept moving in the middle. Two announcers talking back and forth is one method. Interruption of the announcer with bits of the jingle is another. Don't lose listener's attention.

Frequency: this is the most important factor in radio today. A schedule of 75 minute spots per week in a market is considered a minimum in hot radio agencies. Some 250 spots a week have been used by Pall Mall, others.

Group your spots: announcements should be massed within specific time periods so that the listener who hears it once will hear it again and again. By grouping commercials you can guarantee maximum impact.

than can be effective. English voices—like Commander Whitehead's. Dialect voices—like Mr. Thom McAn's. Honey voices—like Parker Fennelly's for Pepperidge Farm. High voices. Low voices. Anything but a radio announcer's voice. Of course, it is crucially important to fit the voice to the message and the product.

How should a commercial end? The most important thing to do is to end a commercial on a high note, leaving the listener with your sales message stated in its most convincing terms. If your commercial has a good jingle, it should be repeated in toto or at least the lines containing the sales message should be repeated. If your commercial is built around a sound effect, the sound effect should be repeated with the sales message.

The important thing is not to allow a commercial to run down hill after a sparkling start. Some very successful commercials have even repeated a jingle line throughout the commercial. One must never let the listener's attention slip away once it has been won.

I hesitate to get into the media department's field, but it is impossible to discuss radio commercials without discussing *frequency*. In the late, great days of radio, a definite pattern of spot radio buying was established. You put your clients on 52 weeks a year. Seven evening spots a week was considered a very reasonable schedule. Some 20 daytime spots a week were hot stuff.

And they were in those days of active, intense, primary listenership. But the tragic thing is that many agencies are still buying radio in this outdated pattern.

Volume has become a vital ingredient in successful radio today. Your commercial should become a part of your listener's life during the period that it is on the air. The knowledgeable radio advertisers of today have established a new pattern. They buy from 75 to 250 spots a week in a market. They saturate markets for six weeks and then they drop out. Then they come back. They blockbust a time segment, running two or three spots within an hour on the same station. And so forth. The wise radio buyer today buys spots—not rating points.

FISH STORY

The gratitude of a sponsor for money he's made out of a radio campaign has never been expressed better than in the letter below. It tells what a \$3 spot did for Henry Engelhard who is in the fish business in Michigan.

The 10-second I.D., broadcast over WBCM Radio, in Bay City, brought car after car to the Bay Port dock, over 40 miles away and sold boatload after boatload of freshly caught perch and all this within a few hours of the announcement.

As indicated in the letter, Henry Engelhard is very anxious to continue his schedule on WBCM and even step it up a bit.

This is probably as small a "campaign" as you'll ever read about in the pages of SPONSOR. And yet it has significance going far beyond the question of numbers. For this is what radio is: a town crier that gets results—fast—in small town or big city. And this is why radio lived through an age of panic into an era of great expansion. You'll find the statistics elsewhere in SPONSOR, but for the feel of it read the letter below.

BAY PORT FISH COMPANY

Catchers Of and Wholesale Dealers In
Freshly Caught Trap Net Fish

BAY PORT, MICHIGAN

To the Manager
Radio Station WBCM
Bay City, Michigan

"Good friends":

Yesterday mornin', before leaving for church, I called your station, asking for a \$3.00 ad advising your listeners that I will offer perch for "depression prices." Your man stated the office was closed for advertising, but I begged him to contact proper authorities, try to get this ad on around noon. While he could not guarantee, he said he would try.

Naturally, after church, I immediately tuned in your station, and really heard your wonderful announcement. You certainly deserve a "fine mess of fish" on top of the \$3.00 for this grand job.

It was only an hour or less later, when my phone began to ring, as customers started to arrive...some in Cadillacs, some in Fords, some old, some new. Sincerely, there was hardly parking space left on the fish dock, as they swarmed in to take advantage of this great opportunity. And, were they pleased.

So was I. And, I wish to ask right now, plan on another \$3.00 ad this coming Saturday, around noon, if possible; and definitely another \$3.00 spot at that 12:00 9 o'clock noon time, same as yesterday. The same repeated ad, again; Henry Engelhard of Bay Port Fish Co., Bay Port, reports good catches of perch, available at "depression prices". Yes; ~~the~~ will even scale them for you for only "one penny" per pound extra. Yes, one penny for scaled perch. Also available dressed, or filleted. And, since the perch season closes April 15th., this is the last chance, to secure Perch for Depression prices.

And, please when through this way, look me up personally, and see to it that I keep my promise for a mess of fish for you and your family. I will feel hurt, until you accept my offer.

Thanks, again. Needless to say, I started out this morning with a thousand pounds of perch on hand; and my last boat landed at my dock with over a thousand pounds. Ended up at night, with 300 pounds perch left. So, has sufficiency for all my customers, if they could wait for the boats to land at the dock.

What a thrill it was to them, to watch two boats land with fish alive & flopping—pick out their choice of fish, have it scaled, filleted or dressed, and take home the choicest eating in their history—still offered at depression prices. Last chance this week end—season closes April 15th.

Very truly yours

Henry Engelhard

Note: - Bay Port is 40 miles from Bay City. Spot was a 10 second I.D. P. G. G.

1. Idea session roughs in Mercury campaign strategy. (Left to r.) W. S. Roberts, "Rick" Levy, WCAU-TV salesman

and Franklin S. Roberts, v.p. Roberts agency (r.) hit upon direct lead approach. Prospective customers were offered a free trial ride

SO RETAILERS CAN'T AFFORD TV

By banding together, Philadelphia-area Mercury Outboard dealers broke into tv. WCAU-TV and the Roberts agency show how retailers can organize to share tv costs and take advantage of co-op funds

"Advertise on tv? That's fine for U. S. Steel, but I'm a little guy." Typical reaction from many a retailer. Yet this same "little guy" will not hesitate to use newspapers.

When you ask why, he'll mention cost. But the fact is that he knows how to advertise in newspapers. He knows what kind of ad pulls customers, what kind of item brings the reader into his store. Tv to him is a "fairy castle."

Retail tv has long been the loser because of the need for retailer education—stemming from a lack of interest in selling the "little guy." But where the effort is made the results are amazing.

When WCAU-TV, Philadelphia, successfully staged a tv campaign for a group of Gulistan rug dealers in the area, "Rick" Levy, a WCAU-TV salesman, and the W. S. Roberts agency saw a potential in dealer group tv advertising and set out to sell the concept.

Marine Equipment and Supply, a Mercury Outboard motor distributor, was chosen as a prospect and the pitch was made. A cooperative method of tv advertising was outlined to the distributor and his Philadelphia area dealers.

It was pointed out that with the addition of a little more money to the usual advertising program, the budget could be put into tv advertising.

At this point everything was turned over to the Roberts agency for development. Franklin Roberts met with the dealers and outlined the campaign and the fundamentals of tv advertising. The WCAU-TV team outlined the benefits of local tv advertising on their station.

The distributor agreed and 12 dealers within the WCAU-TV coverage area were signed.

Timed to break at the peak of the outboard selling season in May, one-minute commercials were placed during the *Million Dollar Matinee* (Monday-Friday, 5:00-6:30 p.m.), the late evening show *Million Dollar Movie*, (both highest rated feature film shows in the area): and *Victory at Sea* (Sundays, 6:00-6:30).

The campaign lasted two weeks. The cost for the 12 one-minute commercials to the dealers was some \$200 each. The total revenue to the station was \$4,000 (\$1,600 was from the Mercury co-op fund).

2. Pitch to dealers is handled by Roberts and WCAU-TV sales staff. Fundamentals of TV advertising were outlined together with the methods of getting the most out of the campaign. Poster held by Roberts is part of in-store promotion

4. Demonstration of the Mercury Outboard is staged for Ed McMahon, who wanted to learn first hand what the outboard could do before he pitched it on television. McMahon, representatives of the manufacturer, station and agency take a spin

5. First hand experience helps McMahon to emphasize selling points of the Mercury Outboard motor. Knowledge of performance and operation allows Ed to "spice up" the agency-supplied fact-sheet in announcements on the two daily WCAU-TV feature films

3. Contract is signed for time on WCAU-TV. (L. to r.) Ed McMahon, WCAU-TV personality; Robert S. McGredy, v.p. in charge of sales, WCAU-TV; Roberts (signing for retail group); Don Kirkland, Kiekhaefer Mercury, client

6. Customer leads are checked by "Rick" Levy as mail after the first few days of Mercury commercials begins to pile up. The viewer demonstration requests are divided equally among the 12 participating dealers and pin point a large number of potential Mercury customers in the area

MOST INDEPENDENT AFFILIATE

Don McGannon, 36-year-old president of Westinghouse's 10 stations, foresees new "get-tough" policy among affiliates against television network use of the station's own time. Here are his views on today's broadcast problems

Don McGannon is one of those easy-going, genial fellows you feel you've known all your life after about 10 minutes. But here's what it takes a little longer to know:

Item: He sets policy for the 10 Westinghouse Broadcasting Corp. tv and radio stations from a lush office-living room suite atop Manhattan's Chanin Building. But luxury embarrasses him.

Item: He's got a soft-spoken, natural charm that might be traced to his father ("an Irish fire chief with a feel for New York"). But top WBC executives know him to be a driving work-

er with no mercy for the clockwatcher.

Item: He helped disassociate the WBC radio stations from network affiliation. But he fights hard for strong tv affiliations for the four WBC tv stations.

Item: McGannon believes in close affiliate-network teamwork. Yet he told SPONSOR that the WBC tv stations will resist further network moves into station-option time: "There are only a few high-set-in-use periods left to the stations as it is." In his soft-spoken way, he may very well be the most independent affiliate.

McGannon came into broadcasting

through "a casual conversation with Chris Witting" who brought him into DuMont as his administrative assistant. He took to tv like Snead took to golf, followed Witting right on up into the the WBC presidential suite at age 35.

Today, the young man who was born "two express and one local stop" from his midtown New York office, shapes programing, sales and administrative policy for a widely scattered group of 10 stations. (He has almost as many children as he has stations—nine—the youngest having been born this month.)

Some of the problems that came

Client-agency relations are McGannon's frequent lunchtime occupation. Shown here (third from l.), McGannon discusses "new radio" with (l. to r.) Jim Luce, assoc. media dir., JWT; A. W. Dannenbaum Jr., WBC sales v.p.; Perry Bascom, WBC radio sls. mgr.

Film, feature and syndicated, is "mainstay of local tv programing today," says McGannon. Searching out new film fare for the WBC tv stations, McGannon discusses programing with Ely Landau, pres. NTA Film Network (l.), and Dick Pack, programing v.p.

along with the responsibility of heading up WBC seem tailor-made for Fordham lawyer McGannon, who's been said to thrive on tackling insoluble problems. Currently, WBC figures importantly in a Justice Department anti-trust action against RCA and NBC who are charged with having exerted "undue pressure" upon WBC in bringing about the Philadelphia-Cleveland tv station swap.

(As a reminder, the WBC radio stations are: WBZ, Boston, 50 kw. and WBZA, Springfield, 1 kw. two transmitters operating as one station; KYW, Cleveland, 50 kw.; KDKA, Pittsburgh, 50 kw.; WOWO, Fort Wayne, Ind., 50 kw.; WIND, Chicago, 5 kw. bought last year; KEX, Portland, Ore., 50 kw.

(The tv holdings include: WBZ-TV, Boston and KYW-TV, Cleveland, both NBC TV affiliates; KDKA-TV, Pittsburgh, now taking programing from all three nets, but to become basic CBS TV affiliate when a second vhf goes on the air in the area; KPIX, San Francisco, a CBS TV affiliate, WAAM, Baltimore, will be bought subject to FCC approval and is an ABC TV affiliate.)

Here, in question-and-answer form, are details on how McGannon looks at station operation today.

Q. *Why did WBC agree to the exchange of your Philadelphia stations for the NBC Cleveland stations, which led to the Government anti-trust action taken against RCA and NBC?*

A. We purchased WPTZ for \$8.5 million based on our ability to realize a certain level of return, and an NBC affiliation. Within one year later we were confronted with one or two alternatives: one, retain the station, lose the NBC tieup and have our earnings radically reduced; or, two, sell to NBC. We used our best business judgment and elected to preserve our investment

as fully as we were able to. We made it clear from the start that we didn't want the exchange and would so express ourselves if the occasion arose.

Q. *Do you see any change in the texture of station-network relations in the immediate future?*

A. There are many factors which could bring that about. You only have to read the latest Celler Committee report to see that certain generally considered established elements of the business are in a state of flux. For one

New radio shows are auditioned by McGannon, (l. to r.), Charles Woodward Jr., WBC adm. ass't to pres.; Dick Pack, programing v.p.

thing. I know the stations are concerned over the further clearance of network shows in station time.

As it is, network option hours leave mainly low-set-in-use times to the stations except 10:30-11:00 p.m. and 6:00-7:30 p.m. Only during these non-network option times can the station establish its own character in the community. This is important to the network too in terms of the audience the station can then feed in to the network programming as well as the station's value as an advertising medium within the network station lineup.

Of course, with this sort of stand (not clearing more station-option time) comes added responsibility as well. For instance, most of us liked it pretty well when NBC went into the very early morning hours which have always been difficult and expensive for the stations to program and never brought very good returns. On the other hand, there has to be a consistency about a policy. If we object to the networks coming into the 6:00-7:30 p.m. and 10:30-11:00 p.m. blocks, we must correspondingly face the necessity of having to program the early morning hours or the late night hours if that be a consequence of nets giving up option time.

Q. *Have feature films given stations greater ability to program effectively and independently of the networks?*

A. Feature films have certainly been big audience-getters for us. When Hollywood released its libraries, the totality of this creative effort of 20 years brought about an accompanying elevation of the public taste and threw into low audience acceptance much of the local live entertainment effort.

Certainly, local live programming cannot meet this competition because of the high costs of local live shows, the non-availability of broad talent pools outside Chicago, New York and L.A., and the gravitation of the audience to motion pictures with outstanding star value, strong story lines and costly production and promotion budgets.

ARTICLE IN BRIEF

Since Don McGannon became WBC president two years ago at age 35, he has firmed tv station policy toward network time options, is now promoting new program and sales ideas for the 10 WBC stations. He tells his views on air media in SPONSOR interview.

Q. *You acquired some features on a barter basis. Would you be willing to extend such arrangements into the future?*

A. Probably not. We bought the RKO library for three of our markets at a time when this was the only major library available, and we regarded the product as desirable from a programming viewpoint. The arrangement finally achieved, in our opinion, balances any of the possible disadvantages of such a deal—particularly the fact that we retain absolute control of the continuity, copy and the advertiser.

Today, product is sufficiently available on a cash basis, thereby obviating the occasion for such an arrangement in the foreseeable future.

Q. *How long do you think the appeal of features will continue, and what will happen after the supply runs out?*

A. We think the 6,000 pre-1948 features will be effective program material on our stations until 1961 or 1962. Then the post-'48 films will provide another two years of programming.

We're actually more concerned with high quality programming material beyond that period. Where will the writing and acting talent and other produc-

Review of WBC stations' sales and ratings is subject of executive sessions at WBC. Here, John L. McClay, ass't to Cleveland area v.p., describes current KYW and KYW-TV ratings to (clockwise, starting lower r.) Don McGannon; A. W. "Bink" Dannenbaum, Jr.; Dick Pack (standing); Mel Goldberg, research director; Perry Bascom, radio sales manager.

Engineering problems of the 10 radio and tv stations are reviewed by McGannon (l.) and George Hagerty, ass't engineering mgr. WBZ-TV tower is subject of study.

tion facilities come from after that? You'll never again have the reservoir of 30 years production effort as is available now.

When we tried pitting local live shows against features, we lost audience. As a consequence, we scheduled feature and syndicated film programs in order to compete for the attention of our audience.

Q. *What about Mike Wallace's Nightbeat on WABD? Doesn't the success of that show prove you can program live against features and against net competition?*

A. Yes, Mike Wallace did well against features. That just bears out our own continuous searching for ingenious creative forms in competition with film and other programming. We're looking for such forms. We haven't eliminated our staffs or abandoned live programming development, but we're programming film at the moment in many periods.

Q. *Are the networks getting the most they can from the affiliates other than in the matter of clearance?*

A. I don't think so. They're frequently overlooking the local operation as a source of talent and programming. And further, they could use local stations as an effective sounding board to get local reaction to programming and advertising value of a network project.

The industry collectively isn't doing enough to develop new talent. And now that there's limited occasion for stations to do more live programming, a natural training ground for network tv talent of the future, the networks and stations should really join hands in an effort to collaborate in new talent development.

Q. *Should programming control be in the hands of the networks or agencies?*

A. Tv is a hungry medium. It can't afford to overlook any good programming source.

Q. *Do agencies let station men in on their plans?*

A. We certainly would like them to. In fact, we go to the agencies and advertisers on a regular basis to find out their needs. While we're not a network with a huge sales force, we are close to our stations, each of which acts autonomously. Our national reps (Peters, Griffin, Woodward, the Katz Agency and AM Radio Sales) are at the agencies on the time buying level

every day of the week.

But we ourselves have meetings by individual agency either at lunch or here in our offices, where we discuss new programming or sales or promotion projects we've developed. We feel that ratings and audience alone don't tell the whole story. We want to know what effect we have on a client's whole marketing effort. We've realized the need for a continuously more informed sales force to deal on a marketing level.

Q. *What kind of marketing problem have you been called upon by any agency to solve?*

(McGannon, who likes to delegate

authority to his top executives when he can, asked A. W. "Bink" Dannenbaum Jr., v.p. in charge of sales, to talk on this point, since he's in far closer contact with this problem than I.)

Dannenbaum: There should be a greater feeling of mutual dependence and reliance between agencies and media. But the situation is improving every day.

For instance, an agency for a soft drink client had a particular sales and distribution problem. Its consumer surveys showed they were not getting to the teenager—their best market. Well, the agency came to us and said, "Can WBC deliver this audience and

reach the "city on wheels"

2,339,700 automobile radios—and the bumper crop of home listeners.

Our programs are geared to this audience and have been selling it for over 31 years. Let us help you sell yourself and your product to this key market area.

how? What's your recommendation?"

We like it, of course, when we are called upon this way, because we can then tailor schedules for them or give them existing programing and still serve our listening public. We don't have all the answers but we sure relish the chance to turn a creative, dedicated team loose on such a problem.

Q. *What have local station such as yours been able to do to make national campaigns pay off for advertisers in sales?*

A. (Dannenbaum): This past year we have extended and improved our use of national sales coordinators at each station. The function of these coordinators is really to sit down with the client's local distributors and sales force and explain to them the basics of broadcast selling (stuff that the tea salesman, for example, doesn't know). They help him understand ratings, the reasoning behind the schedule, the advertising aims. They show the client sales force how to use radio-tv advertising to get more or better shelf space and to sell to department stores and other retailers.

If the client salesman feels public demand will result from advertising, he isn't afraid to push hard and get extra shipments to the store.

Q. *What do you think of the future of spot radio and tv business?*

A. (McGannon) A relatively small part of spot tv's high level today is due to rate increases. Rather, the expansion of the business has been such that there's greater dollar volume. More advertisers are continuously coming into the spot media.

I believe that 20% to 21% of all advertising budgets in the next five years will be in radio and tv—the electronic media.

Q. *What frequency do you recommend to clients as optimum in radio and tv?*

A. There is no fixed or rigid rule—it varies with each client, each product, each marketing effort. The client must diversify his message just as we change our personalities on the air. We spend hours rewriting the news so the words won't become tiresome. The same should be done with commercials.

This year, more advertisers seem to be aware of this in radio. The resurgence of radio in 1956 versus 1955 makes it hard to compare the two years. There's been quantum improve-

ment, not only from our business point of view, but also in the more effective use of the medium.

Q. What makes a good commercial? What would you suggest to a client?

A. Be a trend leader, not a follower. Try to be entertaining, imaginative and above all, novel in your approach. Get an announcer who fits your product and your audience and is believable. Try to use local d.j.'s when you can since they're influential in their markets. Integrate live commercials with the local program character and flavor. Give local personalities leeway with your copy.

Q. What are the sins in commercials, as you see them?

A. In tv, the worst commercials have the video wording saying one thing and the audio something else. But here are other faults: blatancy, talking down to the audience, extravagant claims for the product.

I think many clients lose the best part of spot by using transcribed announcements or insisting upon a word-for-word delivery by a local announcer. Also, some tend to tax the audience with over-long commercials. And then there's always the client who insists on just one particular time during the broadcast day instead of trying to reach the station's entire audience, morning, afternoon, evening and night.

Q. Where does radio's future lie? What is the scope of modern radio?

A. We talk of modern radio as the medium since the advent of tv, which represents a radical change from radio's previous status, when it was the focal point of home entertainment with heavy sets-in-use at night and emphasis on spectacular and feature programing.

At that time, a small group of stations, not network affiliated, couldn't resort to high-cost programing and therefore evolved the music and news pattern. They weren't generally well recognized at the time, but now the WIND's and the WNEW's are the leading stations of the country, particularly since 1950 when the corresponding decline of radio networks set in.

That's why our radio stations have resorted to local programing entirely. The role of radio today is that of a local, personal, companion, omni-present, multi-attention medium.

In programing, the pioneering of the independents modified by creative thinking is the answer. We reach for

In Mobile ...

GETS STILL BIGGER IN ALL 3 DIMENSIONS !

A.R.B. WKRG-TV sets a new record in A.R.B. (Feb. '57), leading 281 to 150 in quarter-hours when both VHF's are on the air . . . with a record new night-time lead, too . . . 139 to 59!

PULSE Telepulse (Sept. '56) shows WKRG-TV leading in 275 quarter hours to 171 for Station "X". Even then, the night-time lead was one-sided, 117 to 48.

NIELSEN Nielsen Coverage Service (Report #2) shows WKRG-TV leading in every department . . . covering 33 counties to 26 for Station "X", with 45,000 extra homes in Channel 5's Nielsen Coverage Service area.

the broadest possible audience with programing that (1) renders valid service in the fields of news, weather, community, leisure hours and traffic, and yet (2) achieves listener appeal with meticulously selected music, well produced.

Not many advertisers realize the amount of pacing and production know-how that's needed for good music programing. If all it took was a stack of records and a voice, anyone could do it. But we've invested in talent, personalities and creative pro-

graming staffs to program music well from the listener and advertiser viewpoint.

We've tripled our news staffs for all radio stations. We've also acquired mobile units and beeper-phones to relay back to the stations the news with the outstanding quality of radio—immediacy. In news today, we're committed to the concept of going out and getting the news better than newspapermen do. We've set up a stringer system for suburban areas to feed us information, rather than relying on wire

service or police reports, in order to serve fully and completely the communities that surround each of our major markets.

Radio today is a mobile, dynamic thing, and you can't afford to let anything impair your audience. The Bureau of Applied Social Research at Columbia University found that people today in radio listen not to a show, but to a station. There's constancy in listening, with severe emphasis on flow of audience.

Q. How do you custom tailor your news coverage to your local markets and local needs?

A. We want all our news efforts to be especially meaningful to our local areas. For example, our Washington Bureau will reach for national news with local flavor. For instance, Rod MacLeish, our Washington correspondent, interviewed Jack Kennedy on his presidential aspirations, and an analysis of the meaning behind his being on the panel to select the top five senators. We might seek similar angles with Senators Lausche or Knowland or Douglas or Saltonstall for some of our other markets.

In other words, we try to avoid straight international or national news that is available from the wire services or the networks, without tying it in in some way to the meaning it carries for our particular market.

Q. How do you think future population growth and shifts in the U.S. will affect your powerhouse radio stations?

A. We've made a careful study of such vast moves into outer areas of metropolitan centers as the one referred to in J. Walter Thompson's Interurbia study and we feel that these not only favor the 50 kw stations, but apply with almost equal force to tv. (SPONSOR analyzed *Interurbia* and its air media implications in detail in the 8 June 1957 issue.)

Our current aim in programing the 50 kw's is to maintain their local character even though they service such a broad area of people. For instance, WBZ covers parts of five or six states, but we sell it rather as the strong local station covering an entire "communications area."

Radio and tv have found the most custom-tailored value in interurban patterns. Newspapers have specific physical distribution problems beyond the metropolitan confines, whereas the air media do not.

THE RAMPARTS WE WATCH

This is the area of Eastern New England served by 50,000 watt WHDH. With this, the fifth survey of the 25 county WHDH area by Pulse, Inc., the number of interviews conducted in this series reaches 41,000. This survey is made in the same manner as Pulse of Boston, now in its eleventh year with a total of 582,200 interviews conducted in the five counties of Metropolitan Boston.

There is a close corollary between the January-February 1957 Pulse of Boston and the January 1957 Pulse of the WHDH area.

The average quarter hour ratings of both reports show a very slight difference (one tenth of a rating point), which again proves the premise, stated and proved in 1953, that WHDH serves its area with the same leadership in which it serves Greater Boston.

But above and beyond the mere statistics of rating points, radio is families and people, and the facts in this survey show that more men and women listen to WHDH than the total number of adults plus teens and children who listen to the second highest rated station.

The men and women, purchasers of food-stuffs, drug products, apparel, real estate, house furnishings and automobiles, listen to WHDH in greater numbers than they do to any other radio station in New England.

No matter where you buy on WHDH, you can be sure of having the greatest number of potential purchasers for your product within these ramparts we watch from Rockland, Maine, to Pt. Judith, Rhode Island, and from Boston to west of Worcester.

WHDH

50,000 WATTS • BOSTON • 850 KC

HERE THE RAMPARTS WE WATCH, FROM ROCKLAND, MAINE TO POINT JUDITH, RHODE ISLAND AND BOSTON WEST THROUGH WORCESTER

In the first area survey, January, 1953, it was proved that the listening habits of people in the twenty counties outside the city area differed from those of the 5 county city area. Listeners-per-hundred-sets differed in the two areas. The WHDH city ratings were projectable to the total area, whereas those of network affiliates were not projectable.

In the second area survey, January, 1954, it was proved that: There is a difference in audience composition between at home and out-of-home listening. Audience composition varies when the total audience is counted. The cumulative weekly audience of individual programs on WHDH and other radio stations is from 2.0 to 8.16 times larger than the average daily quarter hour rating.

In the third area survey, January, 1955, it was proved that: The listening audience to radio comprises the greatest circulation of any medium, because the Cumulative Pulse Audience figures showed that radio reaches into 93.6% of the homes in the course of a week. WHDH became more dominant in its area than in the preceding two years. WHDH reached into 71.2% of the homes in the area in the course of a week.

In the fourth area survey, January, 1956, it was proved that: The metropolitan factor of WHDH more closely the ideal factor than any other Boston radio. WHDH penetrated the area more deeply than did any other station.

In this Fifth Area Survey, January 1957, in addition to other pertinent data we show:

Audience in total numbers of men, women, teens and children listening per half hour Monday through Friday, and hourly on Saturday and Sunday to WHDH and the four next highest rated Boston stations. This is the first time such a study has been made, and it enables an advertiser to figure the cost per thousand for men, women, teens and children listening to the major Boston stations.

TOTAL 100

The counties listed to the left are those in the WHDH coverage area. Those which are asterisked are in the Boston City area which is part of the total area. The total 25 counties contain 1,493,800 radio homes.

This 25 county area contains 75% of the population of the four New England states of Maine, New Hampshire, Massachusetts and Rhode Island. And this 25 county area accounts for 77% of the retail sales of the four states.

The people in the area bought seven and a quarter billion dollars worth of retail goods last year.

Therefore, we believe that time buyers should be aware of the facts about this seven and a quarter billion dollar market.

METROPOLITAN FACTOR

The Metropolitan factor is simply the percentage of the number of homes in the metropolitan area opposed to the number of homes in the total area. In this 1957 Total Area Study there are 1,493,800 homes in the total 25 county area and 912,700 in the 5 county Boston metropolitan area. The percentage of the city homes to the total area is 61.1%. This 61.1% becomes the ideal Metropolitan factor, and indicates that any station approaching this ideal may project its city ratings to the total area with accuracy.

In the table to the right, the average quarter-hour ratings are taken from Pulse of Boston, January-February 1957 and Pulse of WHDH Area, January 1957. The table also includes the ideal and actual metropolitan factors. It will be observed that WHDH's metropolitan factor closely approaches the ideal factor with a slight margin of tolerance of only two and two-tenths percent, thereby showing intense listening to its facilities outside the metro area.

RELATION OF THE CITY AREA AUDIENCE TO THE TOTAL AREA AUDIENCE

METROPOLITAN FACTOR Or Projectability of City Ratings to Total Area

STATION	AVERAGE ¼ HOUR RATING 8 AM-12 MID. MONDAY THRU SUNDAY, JAN. 1957		METROPOLITAN FACTOR	
	PULSE OF 5 COUNTIES	PULSE OF 25 COUNTIES	IDEAL FACTOR	ACTUAL FACTOR
WHDH	4.6	4.5	61.1%	62.4%
A	3.03	2.38	61.1%	77.8%
B	3.73	2.60	61.1%	87.6%
C	3.64	2.88	61.1%	77.2%
D	2.50	1.75	61.1%	87.2%
E	2.26	1.43	61.1%	96.5%
F	2.17	1.34	61.1%	98.8%

The accompanying graph shows the close relationship between WHDH "city" and "area" ratings. This chart is based on all rated time periods, Monday through Sunday, from 6:00 AM through 12:00 Midnight. The figures were taken from Pulse of Boston, January-February 1957 and Pulse of WHDH Area, January 1957.

CUMULATIVE PULSE AUDIENCE

As further proof of WHDH's status in its 5 county area, the chart on the right shows the penetration of WHDH and six other Boston stations into the 25 county area. For simplification we have compressed the report into five 5-county breakdowns of Maine, New Hampshire, Rhode Island, Metropolitan Boston and other Massachusetts counties. In each case WHDH reaches more homes in the course of a week than any other Boston station.

WHDH AUDIENCE COMPOSITION

For the first time, we have determined the actual number of men, women, teens, and children listening to *each radio station*.

From the listenership data obtained in the total area survey, audience composition was tabulated for seven stations. This was done by half hour periods for the Monday-Friday average, and by hours for Saturday and Sunday. The data are reported as the total number of men, women, teenagers, and children listening. This is the

combined in-home and out-of-home audience. Men and women are 18 years of age and older. Teenagers are 12 to 17 years of age. Children are 11 years of age and younger.

These figures are available for each of the seven major Boston stations. For purposes of brevity and space, we have published figures on the five leading stations: WHDH, WBZ, WCOP, WEEI and WNAC. (Data on WORL and WVDA on request)

Monday through Friday by half hours

Cost per Thousand

an ease with finding cost per thousand for men, women, teens, and children. The closest corresponding number in the table on page eight (cost per thousand) under Homes. Find the cost per thousand for men, women, teens, and children. For example, if you find Friday at 6:00 P.M. WHDH has 63,300 men, find the closest figure in the audience column on page eight and find the closest figure in the table on page eight. Cost per spot column shows that the cost per thousand men at 6:00 P.M. is:

\$15	\$18	\$30	\$36	\$50	\$55
.23	.28	.46	.56	.77	.85

WHDH's continuing dominance is a result of its sensitivity to listener change. The plethora of "Top 40" programming on other stations gives WHDH the opportunity to stand out even more solidly. Realizing that the radio dial can become monotonous with such mechanically contrived programming, WHDH has expanded *its* live programming in the continuing concept that it must always maintain an individual personality and sound for the listener. At the same time, such live programming must be equal or superior to such recorded talent as might be offered competitively. Attesting to such quality is the fact that three of WHDH's featured artists record for RCA Victor and Columbia Records.

This sensitivity to the changes that occur in listening habits is the major factor for WHDH's continuing dominance over all other radio stations since the advent of television.

The graph at right reflects WHDH leadership and dominance in its 25 county coverage area.

RATING POINTS - - PROJECTED TO RADIO HOMES BASED ON 1,493,800 IN WHDH AREA

AND COST PER THOUSAND PER SPOT ANNOUNCEMENTS AS INDICATED

AUTO LIABILITY INSURANCE

SPONSOR: Universal Insurance Agency AGENCY: Benjamin Katz

Capsule Case History: A steadily maintained increase in the number of hot prospects, life-blood of insurance agencies, has been achieved by the Universal Insurance Agency through radio. In October '55, Universal decided to experiment in selling its auto liability policies through WHAT, which concentrates on Negro audiences. Directing its campaign at uninsured drivers, the firm purchased several five-minute shows weekly, but results in the first week 150 direct leads—were so gratifying, it immediately switched to an across-the-board buy. The company purchased all available five-minute segments on the late afternoon portion of *Snap Club*, a campaign of 19 segments weekly at a cost of \$245 per week. Universal is still maintaining this campaign, and has been averaging 100 leads per week. It reports it has become the largest local independent and has drastically reduced the number of uninsured drivers.

WHAT, Philadelphia

PURCHASE: Announcements

FERTILIZER-INSECTICIDE

SPONSOR: Ward Feed Store, Inc.

AGENCY: Direct

Capsule Case History: Local tie-in advertising following a network plug proved a combination that brought excellent results for Ward Feed Store of Syracuse. Starting 8 April, and allocating its entire ad budget, Ward's launched a Monday-through-Friday series of one-minute spots on WHEN. The campaign was concentrated on Fiestar, a fertilizer and insecticide. Ward's bought the 11:30 a.m. spot immediately following the Arthur Godfrey network show, which was also advertising Fiestar. Prior to this campaign, Ward's had been handling a maximum of one carload of Fiestar a year. Using this WHEN promotion only, they have moved 31½ carloads in the past 11½ months, a sales increase of approximately 25-fold on the product. (Incidentally, Fiestar requests from market centers as far away as Norwalk, Ohio, and Elkins, W. Va., caused the station to theorize that sun spots have been boosting their signal coverage).

WHEN, Syracuse, N. Y.

PURCHASE: Announcements

BOTTLING WORKS

SPONSOR: Wash. Coca-Cola Bottling Works

AGENCY: Direct

Capsule Case History: A report of instantaneous results through the use of local radio advertising comes from the Washington Coca-Cola Bottling Works. Though local franchised bottling works frequently use radio, it was a new approach for this firm. Some months ago when its advertising wasn't bringing in the desired results, it launched a radio campaign. It bought spot schedules on several local, independent stations, including WWDC. On the latter, its pitch was selling through the personality of disk jockeys. Speaking of the campaign, W. N. Sales, manager of the company, reports: "The results were instantaneous, with our three plants in this area showing a 20, 15 and 14% increase in the first month. The success story doesn't stop there. We have continued the spot schedule and are still getting increases each month." Disk jockeys who did the selling for Coca-Cola were Art Brown, Fred Fiske and Jack Rowzie.

WWDC, & Others, Washington, D. C. PURCHASE: Announcements

REAL ESTATE

SPONSOR: Insured Investments, Inc.

AGENCY: Direct

Capsule Case History: The contrast between the high price of a house and the low cost of radio to sell it has lured many a developer. Case in point: Insured Investments, Inc., of Wichita, had found its home sales rather slow. On 1 March, at a cost of approximately \$300 per week, this firm launched a semi-saturation campaign of 50 one-minute spots per week on KFBI. These spots were built with a 20-second singing intro followed by 40 seconds of hard sell. By 1 May Insured Investments had sold 53 homes at a total cost in radio advertising of approximately \$2500. Some newspaper promotion was used (the newspaper budget was cut in half to pay for radio), but the firm said that almost all leads came from KFBI. The original campaign was to have run to the middle of June, but due to lack of sewage facilities, sales have been temporarily frozen. The firm's sales manager reports it is awaiting the elimination of this problem.

KFBI, Wichita

SPONSOR ASKS

How do you measure the impact of a broadcast campaign?

Jules Rudominer, executive v.p. in charge of marketing, advertising & merchandising, Rayco Auto Seat Covers, Inc., Paterson, N. J.

Back in April of 1952, our newly-appointed agency, Emil Mogul, developed a novel media-check system designed to measure the comparative effectiveness of Rayco's advertising expenditures. In essence, it lets our customers tell us what brought them into our stores and gives us at headquar-

"developed a novel media check system"

ters a week-by-week measure of advertising effectiveness in each market. More than five years and a few modifications and refinements later, the system remains in effect as one of the foundations of our entire media-buying strategy.

As a franchised operation with 150 stores in major markets throughout the country, we need a method that will show us what our advertising dollars are accomplishing for our individual dealers. Our need was no less apparent in 1952 when our 54 franchised operators were spending 95% of their aggregate budgets in newspapers. Today, the biggest percentage of our advertising budget flows into broadcast media. The change in media was dictated not by whim or even the usual research studies, but by the results of our agency's system of evaluating consumer questionnaire cards.

Each of our operators is supplied with cards prepared by the agency. The cards are divided into three sections: an open-end question which asks the customer, "How did you happen to come to Rayco?"; a more detailed question which asks customers to iden-

tify Rayco advertising seen or heard by name of station or newspaper and name of specific program in the case of radio-tv; and a detachable tab which serves as the customer's unconditional guarantee of Rayco Auto Seat Covers against manufacturing defects for the life of the car. The detachable guarantee, of course, insures a favorable attitude and high response for the media check.

The cards are submitted weekly to Rayco headquarters in Paterson, where they are tabulated, evaluated and summarized. We then send the summary sheets and detailed sales charts to the Mogul agency, which analyzes the figures with one major objective in mind: to determine the effectiveness of our current media structure in terms of sales per dollar of ad expenditure.

In applying the check system to broadcasting advertising, we don't neglect the significant criteria of ratings, cost-per-1,000 of estimated audience and the results of frequent field research studies. These are correlated with the customer checks to give us a constant evaluation of our advertising effectiveness.

Since our operators allocate a share of their sales volume to the advertising budget they have more than a passing interest in the pulling power of their ad dollar. This helps account for the high rate (85%) of consumer responsiveness to the check system, thereby increasing the statistical validity of the tabulations.

We constantly seek refinements and improvements for the system. But it's doing a job for us that the skeptics said couldn't be done: it's getting for us the most mileage out of every advertising dollar.

William C. Stophlet, sales promotion director, The Fair, Chicago

The impact of a broadcast campaign is measured in terms of results. Regardless of media, campaigns are

planned, produced and presented with concrete objectives.

In our world of retailing there are four basic objectives in advertising to the consumer and the degree of ful-

"measured in terms of results"

filment of these objectives determine the impact.

1. **Sales results in dollars** (covering a specific period). Since the retailer's life is built on daily sales, this is vital. Impact here is determined by establishing the percentage cost of the broadcast to three-day sales dollar figures of the product advertised on the air.

2. **Sales results in dollars** (covering a seasonal period). Equally important, this objective covers product that represent greater investment and must be sold over a prolonged but defined period. An example might be swim-wear. This campaign would begin in May, prior to peak selling and extend into late July.

3. **Increased traffic** (transaction inquiries). Such things as store improvement, credit-sales promotion, new customer services, opening of suburban stores all command broadcast time. Measuring impact achieved on these points is more difficult than with merchandise. But a few yardsticks might be: periodic in-store traffic counts, customer interviews and average sales comparisons.

4. **Public acceptance** and favorable opinion. This is important to your standing within the community. It is the impression you wish to establish in the minds of those unfamiliar with you. The results are long-

term and difficult to determine, but will be reflected in increased charge customers; greater sales; better advertising productivity.

Clayton R. Sanders, advertising director, Peoples Drug Stores, Inc., Washington, D. C.

In the highly competitive Washington market, Peoples has one sales formula no one in the chain ever forgets: *Get people into the stores.* Once they're in, Peoples will make customers out of them. The trick is to get them into the stores. And that's where radio

"get people into the stores"

is doing the job at an extremely low cost-per-customer figure.

In fact, store traffic is our yardstick in measuring the success of our overall advertising program and that includes newspapers, radio and tv.

We have used radio consistently for the past seven years and, through experience, Peoples has learned how to use the medium effectively.

With radio we tend to concentrate on a smaller number of items, in contrast to our newspaper ads that feature a greater list of products. The radio spots give intensive coverage to weekly specials, seasonal campaigns such as film and photo-finishing, and constantly feature prescription service.

Peoples is also aware of radio's flexibility. Changes in our advertising copy can be made even a few minutes before air time if necessary.

For example, during a recent unreasonable hot spell in Washington, Peoples switched its radio copy to electric fans. The sales results were instantaneous.

Peoples would also like to point out that we have no static advertising practices. We are constantly checking and reviewing our schedule in an effort to keep pace with public interest.

Radio has become an important part of our advertising program because it creates store traffic and sells goods both on a short and long term basis. It is no longer a question with Peoples whether or not to use radio, but only how to continue its use to our best advantage.

NOW...THE BARTELL GROUP is running **WILD!** and **WBMS,** too!*

Two more GIANT STEPS into two more major markets, and two more radio stations take on the modern broadcasting concept that distinguishes the Bartell Group.

Step No. 1: WILD, Birmingham. Most powerful full-time independent station in Alabama's richest market. 850 KC... 10,000 watts.

Step No. 2: WBMS, Boston. The new Bartell Sound sets off a new revolution in the nation's 6th market. 1090 KC... 1000 watts.

Now, in six cities, from sea to sea, your best buy for building sales is a Bartell Station.

SPOT BUYS

TV BUYS

The Procter & Gamble Co., Cincinnati, is going into scattered markets to advertise its Crisco. Day and nighttime film minutes will be scheduled for the short-term campaign, with an average of three per week in each market. Buying is completed. Buyer: John Pape. Agency: Compton Adv., Inc., New York.

Gold Medal Candy Corp., Brooklyn, is buying Eastern markets for its "Bonamo's" candies. Minute participations will be purchased on late afternoon children's shows and on Saturday; the advertiser is primarily seeking the 6 to 12 age group. Frequency will range from two to five per week in each market. Copy for the live announcements will be written to fit the program's personality. Buying is not completed. Buyer: Joyce Peters. Agency: Emil Mogul, Inc., N. Y.

Block Drug Co., Jersey City, is entering major markets to promote its Nytol sleeping tablets. Schedule will begin 1 July for 24 weeks. Minutes will be placed during nighttime segments. Frequency will vary from market to market. Film commercials will continue the Nytol theme that it's drugless and harmless. Buying is completed. Buyer: Ira Gonsier. Agency: SSCB, New York.

Bristol-Myers Co., New York, has planned a nation-wide campaign for its Ipana tooth paste. Schedule is 30 June to 20 July. I.D.'s have been prepared for prime nighttime hours. Frequency will range from two per week in some markets to 18 in others. Buying is completed. Buyer: Sam Vitt. Agency: Doherty, Clifford, Steers & Sheffield, New York.

General Foods Corp., White Plains, is increasing its schedules in some markets for its Post cereals. New schedule kicks off 1 July for 39 weeks. Minute announcements will be slotted for morning hours; frequency will vary from market to market. Commercials will be both live and on film. Buying is completed. Buyer: Bob Innes. Agency: Benton & Bowles, Inc., New York.

R. J. Reynolds Tobacco Co., Winston-Salem, is entering major markets with a campaign for its Winston cigarettes. Filmed minute announcements are being scheduled for nighttime segments; frequency varies from market to market. Starting date is indefinite. Buyer: Hal Simpson. Agency: Wm. Esty Co., Inc., New York. (Agency could not be reached for comment.)

The Royce Chemical Co., Carlton Hill, N. J., is purchasing spot to advertise its Royox. Daytime minutes and I.D.'s are being used. Frequency: 12-15 per week in each market. Buyer: Robert Crook. Agency: The Samuel Croot Co., Inc., New York. (Agency could not be reached for comment.)

International Shoe Co., St. Louis, is going into 120 tv markets to advertise its Poll Parrot shoes. Schedule will initiate 19 August. Co-operative advertising arrangements will be made with local dealers throughout the country who wish additional promotion. Buyer: Fred Wuelhner. Agency: Krupnick & Associates, St. Louis.

RADIO BUYS

Helena Rubenstein, Inc., New York, is planning a test campaign in Indianapolis for its Redue-Aids. Schedule starts in July and runs for four to six weeks. Minute participations were bought on women's shows, with product copy slanted to the hot weather. Buying is completed. Buyer: Frank Gianattasio. Agency: Ogilvy, Benson & Mather, Inc., New York. (Agency could not be reached for comment.)

The Best Foods, Inc., New York, is using a heavy saturation schedule in major markets to promote its mayonnaise. The campaign will kick off shortly and will have two three-week flights; frequency for minute announcements will vary from market to market. Buyer: Gail Myers. Agency: Dancer-Fitzgerald-Sample, Inc., New York. (Agency could not be reached for comment.)

Gold Medal Candy Corp., Brooklyn, is planning a campaign in Eastern markets for its Cocilana Cough-Nips. The schedule for minute announcements is as yet indefinite; it will run 13 to 26 weeks. The advertiser will use two or three stations in each market, with emphasis on either news or saturation. Commercials will be both live and e.t. Buying has not started. Buyer: Joyce Peters. Agency: Emil Mogul, Inc., New York.

Colgate-Palmolive Co., New York, is entering markets in the Southwest to push its Super Snids. Minute announcements will be placed noon to 5 p.m. daily starting 1 July; frequency will vary from market to market. Buyer: Gary Pranzo. Agency: Cunningham & Walsh, New York. (Agency declined to comment.)

Esso Standard Oil Co., New York, is planning the Fall campaign for its gasoline and oil. The advertiser is considering two five-minute news strips a day in major markets, Monday through Saturday, for a 52-week schedule. Buying has not begun. Buyer: Sy Goldis. Agency: McCann-Erickson, Inc., New York. (Agency declined to comment on campaign.)

RADIO AND TV BUYS

American Cyanamid Corp., New York, is conducting a campaign to familiarize the public with its Aeronized process, which retards spoilage in fresh-killed poultry. The radio-tv schedule is for three flights of three weeks each. I.D.'s will be used during non-crowded daytime segments. Buyer: Bob Palmer. Agency: Cunningham & Walsh, New York.

McKesson & Robbins, Inc., Bridgeport, has arranged heavy schedules in radio and tv in major markets for its Tartan suntan lotion. Campaign will start shortly and will run for three weeks. Buyer: Dick McClenahan. Buying is completed. Agency: Dancer-Fitzgerald-Sample, New York.

News and Idea WRAP-UP

ADVERTISERS

Bourjois (Evening in Paris) will take on the heaviest schedule of network and spot tv in its history for the big Christmas push.

Campaign will be concentrated in the three-week period before the holiday season.

Network show will be NBC TV's daytimer, *Arlene Francis*. Spot will be used nighttime in 111 cities. Lawrence C. Gumbinner is the agency.

Ideas at work: Miller Brewing Co. which co-sponsors the Milwaukee Braves broadcasts, has inaugurated a telephone scoreboard service in Milwaukee. By dialing OR 1-5500 day or night, fans get the scores of the Braves and other major league teams plus a quick plug for Miller High Life . . . Russell's Department Store in Eugene, Ore., uses radio to tell customers about its buyers' activities during their seasonal trips to New York. The buyers make 15-minute tape recordings of informal, on-the-scene news and notes about style, fabric and color trends and then air mail the tapes back to Eugene for local broadcast.

People in the news: William A. Nichols has been named national merchandising manager for Minute Maid-Snow Crop Frozen Foods . . . Karl O. Nygaard has been appointed director of business research for B. F. Goodrich Co. . . . P. G. Beach is now advertising manager for Union Pacific Railroad, Omaha, and H. J. Forbes is advertising manager for the railroad's Los Angeles headquarters.

AGENCIES

Henry B. Cohen's announcement this week that it was resigning the B. T. Babbitt account underscored this: The phenomenal success of P&G's new Comet brand has had a jarring effect on the cleanser field.

The leadership had previously been held by Colgate's Ajax.

Babbitt's '56 expenditure: \$390,000, tv spot; \$830,000, newspapers.

Benton & Bowles is looking around for a half-hour network tv for alternate weeks.

Sponsor: Maxwell House regular coffee brand.

Norman B. Norman has been elected president of Norman, Craig & Kummel to succeed Elkin Kaufman whose resignation takes effect 1 July.

Other changes in the agency's management team find Eugene H. Kummel, former vice president and secretary, becoming executive vice president and B. David Kaplan, former vice president and treasurer also becoming an executive vice president. Walter Craig, the fourth member of the management group, remains vice president in charge of radio and tv.

New agency appointments: Compton for P&G's new product, Ivory Liquid Detergent . . . Clinton E. Frank for Toni's Bright'ning hair color rinse . . . North for Toni's Twirl home permanent for children . . . McCann-Erickson, Chicago, for Lewis & Howe (Tums and Natures Remedy).

Resignation: Buchanan has resigned the Tidewater Oil account effective immediately, but the agency will "complete contracts outstanding." New firms: Halstead Associates, new ad agency, in Kansas City, Mo. . . . John D. Morgan, Chicago agency executive, has opened his own office in that city.

Job notes: William Vance and Victor Miranda have joined the radio-tv department at Fletcher D. Richards . . . Richard Fishel has rejoined the Geare-Marston Division of Ruthrauff & Ryan as sales promotion director . . . George Fenmore has been appointed to the newly created post of director of public relations

and publicity for the commercial products division at Blaine-Thompson . . . **Charles T. Rabkin** has been named account group supervisor and member of the plans board of Emil Mogul Co. . . . **S. E. "Doc" Frohok** has joined K&E as a merchandising executive in the promotion department. Frohok comes from BBDO . . . **Clement W. MacKay** has been appointed executive vice president at Roy S. Durstine, Inc. . . . **Desmond O'Neill**, former associate media director at Bryan Houston, has joined the media department of K&E as a broadcast buyer . . . **George T. Byers** has left Beech-Nut Life Savers, Inc. to join DCSS as an account executive. Another new account executive at the agency is **Robert C. Doherty**, former managing editor of Gentry . . . **Mary Dunlavey** has joined Kastor, Farrell, Chesley & Clifford in an executive capacity and will handle contact-media work . . . **John R. Roirdan** has joined Geyer as an account supervisor. Roirdan comes from Roy S. Durstine, Inc. . . . **Marvin Goldman**, former advertising manager with Rapid Film Technique, has joined Norman D. Waters & Associates . . . **Charles F. Mallory** has joined Goodman Advertising, Los Angeles, as a senior account executive . . . **John T. Murphy** has left Lynn Baker to go with Burke, Dowling, Adams as an account executive and **Edward D. Cummings**, formerly media director at Robert W. Orr Associates, has also joined Burke, Dowling, Adams in the media department . . . **Kirke Beard**, general manager of Anderson-McConnell, has been appointed a vice president . . . **James C. Kissman** has joined Advertising Agencies, Inc., Studio City, Calif., as production director . . . **Herbert W. Warden**, formerly with Ogilvy, Benson & Mather, is now executive vice president of Kastor, Farrell, Chesley & Clifford.

NETWORKS

ABC TV has scheduled the first of its live daytime shows.

Lucky Lady, the Walt Frauer package, will take the 4:30-5 p.m. slot across the board. Interesting twist: this show is the reverse of Frauer's old timer, *Strike It Rich*. *Lucky Lady* has women telling the audience of a piece of good luck that has happened to them rather than a sob story.

Fall network tv programming notes: CBS TV reports that American Tobacco has finally found alternate for the *Jack Benny Show*. It'll be *Bachelor Father*, situation comedy filmed by MCA . . . Kodak was quick to step in this week when Lincoln decided to pull out of the *Ed Sullivan Show* (CBS TV). Kodak will take alternate weeks. Also at CBS TV it looks like (but not firm) Helene Curtis will go in as alternate on *Dick & the Duchess* on Saturday 8:30-9 p.m. . . . Both ABC

TV and NBC TV were quiet on the nighttime fall sales front this week.

Personnel changes: Edward Kaylin, associate director of sales presentations for CBS Radio, has assumed the added duties of administrative manager of the advertising and sales promotion department . . . **Henry W. Cox** has been named national program sales manager for ABC-TV. Cox has been manager of radio and television programming for General Mills since 1951 . . . **Sid Mesibov** is an-

TV STATIONS

The WCAU Stations, Philadelphia, has entered the field of creating and producing tv film commercials.

The commercial film production division will be under the direction of Charles Vanda, v.p. in charge of tv for the stations. Assisting: Vanda Jerome B. Samuelsohn, producer-director at WCAU-TV, and John J. Burke, cinematographer. George G. Steele, Jr., leaves the WCAU-TV sales staff to do the new division's selling.

In announcing the division, Vanda said, "Our new film unit will answer a need long felt by Philadelphia advertising agencies who have had to depend on New York and Hollywood for adequate commercial films. With our technical experience, talent and facilities we can cast, set, film, record and edit all films and preview them over closed circuit television in both b&w and in color. This will mean considerable savings, in both time and money, to agencies and to their clients."

Tv applications: Between 17 and 22 June two construction permits have been granted and three applications for new stations were filed.

Construction permits went to: East Texas Broadcasting Co. for Channel 19, Nacogdoches, Tex., permit allows 20 kw visual; and to Ponce Tv Partnership for Channel 7, Ponce, Puerto Rico, permit allows 1.408 kw visual.

Applications were made by: KSTT Telecasting Co., Davenport, Ia., for Channel 8, Davenport-Rock Island-Moline, 316 kw visual, with tower 1,020 feet above average terrain, plant \$749,696, yearly operating cost \$510,000; WTVJ, Inc., Miami, for Channel 11, Houma, La., 316 kw visual, with tower 990 feet above average terrain; plant \$1,444,500, yearly operating cost \$925,000; and North Dakota Broadcasting Co. for Channel 11, Fargo, 29.05 kw visual, with tower 392 feet above average terrain, plant \$53,450, yearly operating cost \$96,000.

Triangle Station's expansion of headquarters advertising and promotion department works out like this:

- Joe Zimmermann moves into the newly-created post of director of station promotion.

- Kenneth Chernin continues as promotion supervisor of the station.

Both Zimmermann and Chernin will report to John D. Schener, Jr., director of public relations and programming.

Zimmermann will direct audience promotion, merchandising and publicity activities while Chernin will direct the station's sales promotion activities.

Zimmermann was director of advertising and promotion for WFIL-AM-FM-TV, Philadelphia, which recently merged with Triangle.

On the color scene WRCT-TV, Philadelphia, is adding five new half hour local color shows to its weekly schedule. This brings the station's local tint originations up to 11 hours per week . . . WPST-TV, Miami, will go on the air 1 August as an ABC TV primary affiliate . . . KSBY-TV are

the new call letters for KMLC-TV, San Louis Obispo, Calif.

Personnel changes: Russell Kenmeter, former salesman for U. S. Rubber Co., has joined the sales staff of WTMJ-TV, Milwaukee . . . Mann Reed has been moved up to program manager at KBTX, Denver, and Russ Kundert will take over as production manager . . . Alan Cragin has joined KIMB-TV, San Diego, Calif., as a member of the sales staff . . . James R. Bonfils has been named station manager of WTTG, Washington, D.C., and James Anderson, previous station manager at WTTG, has been transferred to the DuMont New York office . . . Robert L. Smith has been appointed to the newly created post of assistant sales promotion manager at KPIX, San Francisco. Smith comes from Foster and Kleiser Advertising in San Francisco . . . Jack Miller has joined KTVR, Denver, as assistant general manager. Miller formerly was an account executive for Buchanan & Co. . . . Dick Robertson has left KSL-TV, Salt Lake City, to take the position of director of sales development, promotion and publicity for

THINKING SIDE-SADDLE?

If you've been thinking side-saddle, why not start some straight-shootin', herd-ridin', calculatin'. WBNS Radio listeners sit up and take notice . . . and they have \$2,739,749,000 to spend. They and Pulse place us first in any Monday-through-Friday quarter-hour day or night. Ask John Blair.

WBNS RADIO

Kilpatrick** has been made operations manager and **C. Thomas Garten** takes over as commercial manager at WSAZ-TV, Huntington, W. Va.

RADIO STATIONS

You may have wondered what is this stereophonic sound that stations around the country are beginning to promote.

The ingredients are simply these:

1) Two stations (either two AM or an AM and an FM)

2) Two receivers tuned in at home.
The method: One station broadcasts

half of the sound—in the case of a musical piece say the strings with the brass heard only in the far background—and the other station broadcasts the other half or the brass with the strings heard only in the background.

The result: The two receivers at home do what two ears do and give full roundness to both sounds (in the musical composition both the strings and brass).

Latest station to experiment with stereophonic sound is WCBS, New York, which will feature an hour and a half of binaural tape recordings on its *Music Til Dawn* show on 29 June. The CBS New York outlet will use its AM and FM facilities and will have listeners turn on both their AM and FM receivers (placed at the same end of the room).

The binaural tapes (which have two tracks) will then be played in this manner: one track over the AM transmitter and one over the FM transmitter.

The same stereophonic experiment was tried on KNX, Los Angeles, last month with strong listener response. Many L.A. single set owners reported the sound was more exciting than ordinary broadcasts.

In another stereophonic experiment WMBR (CBS affiliate) and WPDQ (ABC affiliate) in Jacksonville, Fla., combined recently in a special cooperative broadcast. Purpose was to celebrate their own radio week and was backed by the sponsorship of all radio dealers and distributors in the area.

In New York, WQXR has been broadcasting live binaural musical shows for a number of years.

A new radio station sales and merchandising group, The 99 Group, has been organized in California.

Covering the San Joaquin Valley it includes: KRAK, Stockton, KFIV, Modesto, KYOS, Merced, KYNO, Fresno, KONG, Visalia, and KMPC, Bakersfield. It will be represented nationally, individually and collectively by Headley-Reed.

Ideas at work: At WLW, Cincinnati, a novel approach to station breaks. The station break starts off: "This is WLW in Cincinnati, where . . ." and a bit of civic information, zany humor or sage philosophy follows. An example: "This is WLW in Cincinnati, where there are more than 50,000 eligible bachelors. . . **WBUD**, Trenton, is said to be the first station to use Auto Ad disks, huge hub cap covers which carry a "commercial." Disks are attached to the auto and not the wheel so they remain stationary when the car is going. . . **WBZ&WBAZ**, Boston, has gotten out a trip-finder mileage indicator for people planning a summer drive through New England as a promotional gimmick.

KBIG, Catalina, Calif., has launched what may be the nation's first sea-going disk jockey. Carl Bailey now broadcasts his daily show from the top deck of a cruise steamer as it goes between Los Angeles harbor and Catalina Island. . . **International broadcast** has been arranged by the Air Trails Network Stations (WING, WKLO, WCOL and WIZE) for the International 500 mile race from Monza, Italy, on 29 June. In addition to furnishing the race to its own sta-

tions, Air Trails is making the broadcast available to other stations across the country through the Indianapolis Speedway Network.

Cyril Onellette Langlois, founder chairman of the board of Lang-Worth Feature Programs, died last week.

People in the news: Bill Payne has been made promotion director for KTLN, Denver. . . . Ott Devine is now program director of WSM, Nashville. . . . Robert Sampson, former general manager of WSM, Cincinnati, has been appointed general sales manager for WTCN, Minneapolis-St. Paul and **Jack Cosgrove** has been appointed local sales manager. . . . **Herman Maxwell** has been named director of sales for WRCV, New York. . . . James C. Dowell has been appointed public relations director for KIOA, Des Moines. . . . A. H. "Chris" Christensen has rejoined Westinghouse Broadcasting as advertising and sales promotion manager for KEX, Portland, Ore.

REPS

This week Blair blitzed over a hundred agency and advertiser executives with its quickie "sizzle-pitch," designed to promote the selling-sound of spot radio, 1957 style.

The sizzle-pitch, developed by Blair's Mort Bassett, features a 100-second recording with a 20-second live commercial pitch delivered by the Blair salesman. It works this way:

- The recording demonstrates how a top-selling radio personality handles local-interest comment, time signals, weather information and other service features local in nature.

"When I get my guitar, pardner, yuh can tune me in on KRIZ Phoenix!"

- Then in the live 20-second portion the Blair man points up the "advantage enjoyed by the advertiser in having hundreds of such established local personalities available to present his selling message.

Idea behind the "sizzle pitch" is that it shows a sample of the merchandise, plus sales plug—all in two minutes.

Children's influence on grown-ups' buying habits is neatly summed up in NBC Spot Sales booklet — "Looking for Little People?"

Brochure also outlines the available shows for the momma-buy-me-that set (backed up by success stories) on all stations handled by the rep division.

New appointments: Clarke Brown Co. for KGUN-TV, Tucson, and WTTV, Indianapolis. . . . Devny as United States rep for C-FUN, Vancouver, B.C. . . . Charles Bernard & Co. as national rep for KRKD, Los Angeles. . . . Harlan G. Oakes as West Coast rep and National Time Sales for the East and Midwest for NEM-TV, Mexicali.

New offices: Blair Television Associates, Chicago, has moved to 333 No. Michigan Ave.

Personnel notes: Jack Eisele has been appointed manager of Clarke Brown Co.'s Houston office. . . . Stuart L. Mackie has been named to the Chicago radio sales staff of Avery-Knodel. . . . Carlos Reese is now St. Louis manager for John Blair & Co. Reese takes the place of Tom Harrison who joined ABC Radio last week as vice president and sales manager. . . . Eugene R. Myers has been appointed manager of the newly created CBS Radio Spot Sales St. Louis office. Myers leaves the Chicago office of the CBS spot sales division to take his new post.

ASSOCIATIONS

Tv stations got a clean bill of health last week from NARTB on the length and frequency of commercials on feature film shows.

The association even found that over three quarters of the stations used only a half (or less) of the established allowances. Survey was based on monitoring of 226 movie programs on

49 stations in 24 cities throughout the country.

Average number of commercials per program was 3.6. Majority of the commercials, or 52%, were of one and a half minutes in duration or less and 43% were from one and a half to two and a half minutes long.

RAB will hold its third annual **National Radio Advertising Clinic** at the Waldorf-Astoria in New York on 8-9 October.

Agenda will feature success stories detailed by representatives of advertisers and agencies involved, panels on radio copy, marketing techniques and media research needs.

Conventions and meetings: The Fall meeting of the central region of the AAAA will be held in Chicago at the Sheraton-Blackstone on 17-18 October . . . The annual international convention of the **Radio-Television News Directors Association** will be held 6-9 November at the Balmoral in Miami Beach.

Focus on personalities: Robert E. Kahl, national advertising manager in charge of merchandising and research at the Borden Co., has been elected president of the New York chapter of the American Marketing Association. Other new officers include: vice president, Joseph B. Doyle, General Foods; secretary, John E. Murphy, Bristol-Myers; treasurer, Morton M. Vitriol, Hiram Walker; assistant secretary, Wallace Lepkin, Erwin-Wasey; assistant treasurer, Vernon Hitchcock, Life Magazine. Directors elected were Henry Halper, MacManus, John & Adams, and Howard T. Hovde. Econometric Institute . . . Douglas Anello has been appointed chief attorney for the NARTB . . . Merrill Lindsay, executive vice president of WSOY & WSOY-FM, Decatur, Ill., has been elected chairman of the NARTB's radio board and J. Frank Jarman, vice president and general manager of WDNC, Durham, has been elected vice chairman . . . Joseph R. Rastatter has been appointed director of public relations for the TvB, succeeding Sid Mesibov who resigned to join ABC TV.

FILM

News from NTA came this week from all directions. Here are some culled items:

- Film network features on *Premiere Performance* will be first-run all summer.

- More than \$500,000 was spent by NTA Film Network and its affiliated stations to promote *Premiere Performance* during its first month (April) on the air, according to an estimate by Martin Roberts, NTA promotion director. Future promotion will be spurred by a "showmanship" contest opened to all 134 stations carrying the weekly feature films. About 75 stations are expected to enter before deadline.

- Veteran broadcasting executive Ted Cott has joined NTA. He will divide his time between general executive duties and new program development. Cott had been general manager of DuMont Broadcasting Corp.

- 20th Century-Fox's ownership of the NTA Film Network has been formalized by the appointment of Spyros Skouras, studio president, and three other studio executives to the network board. The three are Donald Henderson, treasurer; William C. Michel, executive vice president, and Otto Koegel.

chief attorney. The quartet joins four film network officials on the board.

- Storer Broadcasting Co. has made a major purchase of NFA feature packages and syndicated films for its five video stations: WPEH, Wilmington-Philadelphia; WJW-TV, Cleveland; WAGA-TV, Atlanta; WJBK-TV, Detroit, and WSPD, Toledo.

- Share of audience for *Premiere Performance* has risen from 22% in April to 40% in June, according to the 15-city Trendex. At the same time, ratings have risen from 10.1 to 11.3, even though sets-in-use declined from about 46 to 28%.

Official Films is riding high with strip sales.

Wells Bruen, syndication sales manager, reports that *Margie* and *Trouble With Father* have been sold in 271 markets, mostly for across-the-board programing. During the past two-and-a-half months, there have been 22 renewals of the two shows.

Bruen said that in two markets, Minneapolis and Buffalo, stations recently bought the shows right after a rival station's contract expired.

Among the stations renewing were WCBS-TV, New York, and WGN-TV, Chicago.

NBC TV Films is preparing for its two-day "Syndication Shindig" opening 12 July at the Greenbrier, White Sulphur Springs, Va. . . . Gill Coffee has bought Gross-Krasne's *O. Henry Playhouse* in six southern markets via Lindsey & Co., Richmond. . . . Screen Gems' *Casey Jones* has hit the 20-station mark. . . . Screencraft has recently sold the *Mickey Rooney Show* in seven markets and the *Judge Roy Bean Show* in five.

RESEARCH

Has the NARTB's long search for a tv station circulation measurement method finally borne fruit?

It looks like it has. The Tv Board's Audit Tv Circulation Committee has recommended that a telephone interview method which has been developed be explained to the industry at at NARTB regional meetings this fall.

The method would measure average daily and weekly circulation plus tv set ownership data on a county-by-county basis.

The research sub-committee of the ATCC said the method developed

"produces acceptable circulation percentages . . . where there is no problem of non-response." At present there is not enough evidence to determine the effect of non-response, the sub-committee said. This problem would be studied in a pilot survey which would have to precede the first nation-wide survey.

Next step: After the fall regional meetings (which will be open to the entire industry this year) the Tv Board will analyze industry reaction and decide what steps to take in putting the plan into effect.

Work on the new method was done by the Politz organization and, later, the Crossley, S-D research company. The experimental approach was to use a mechanical recorder as a standard and test various personal and telephone interview methods against it.

The research subcommittee consists of Hugh Beville, Jr., NBC; Julius Barnathan, ABC; Melvin Goldberg, Westinghouse Broadcasting; Jay Elias-Ferg, CBS, and Richard M. Allerton, NARTB.

The Psychological Barometer, service of the Psychological Corp.,

makes these observations on the current state of tv viewing:

- Three out of every four people say they watch tv more or as much as a year ago.

Where Do Great Ideas Come From?

From its beginnings this nation has been guided by great ideas.

The men who hammered out the Constitution and the Bill of Rights were thinkers—men of vision—the best educated men of their day. And every major advance in our civilization since that time has come from minds *equipped by education* to create great ideas and put them into action.

So, at the very core of our progress is the college classroom. It is there that the imagination of young men and women gains the intellectual discipline that turns it to useful thinking. It is there that the great ideas of the future will be born.

That is why the present tasks of our colleges and universities are of vital concern to *every*

American. These institutions are doing their utmost to raise their teaching standards, to meet the steadily rising pressure for enrollment, and provide the healthy educational climate in which great ideas may flourish.

They need the help of all who love freedom, all who hope for continued progress in science, in statesmanship, in the better things of life. And they need it *now!*

If you want to know what the college crisis means to you, write for a free booklet to: HIGHER EDUCATION, Box 36, Times Square Station, New York 36, N.Y.

Rep. Emanuel Celler's bill to bring services within the purview of the Robinson-Patman Act may have a very slow journey through Congress. That is, if it travels at all.

Aimed primarily at the networks' practice of giving discounts on time sales, the bill also would hit discount practices throughout advertising. Indeed, it would affect countless services fields not now under the R-P Act.

Because the impact would be so broad (wider perhaps than Celler had envisioned) the measure is expected to encounter repeated blocks.

The R-P Act says that with respect to products, discounts must be based on actual cost savings. Celler wants this law to apply the same yardstick to services.

The FCC in a sudden flip-flop now proposes to make Albany-Schenectady-Troy all-VHF instead of all-UHF.

The proposal didn't negate the FCC's earlier action requiring GE's WRGB-TV to shift from Channel 6 to UHF. It merely shelved that idea, pending a final decision on the new approach.

Those interested have until 18 July to file briefs.

The NARTB suddenly has manifested an interest in finding out in depth the methods, tests, and direction of wired subscription tv.

The association heretofore had indicated that it was interested in fee-tv only if air were the carrier. It didn't say much about a system dependent on wires or cables.

But now the NARTB directors want a comprehensive study of viewing habits in Bartlesville, Okla., both before and after the much-heralded test of a wired fee-tv system.

The inquiry is to develop facts on how adversely free-tv would be affected.

With dozens of entrepreneurs apparently willing to gamble that the system will work, the broadcasters now are casting about for ways to halt this possible threat (over which FCC has no jurisdiction).

The FCC would like to have something to say about the anti-trust suit the Justice Department brought against RCA-NBC over the Westinghouse trade-sale deal.

Permission has been asked of the court to file an "amicus curiae" brief.

The FCC wants to argue that anti-trust considerations are not a part of its major responsibility. It seeks to erase the RCA-NBC contention that FCC approval of the Westinghouse deal exempted it from the Justice Department's action.

Quoting from various court decisions, the Commission's brief will contend:

Exemption can only be granted by an "expert" Government body, and the FCC is not, like the Justice Department, expert in anti-trust matters.

The FCC's network study committee now doesn't expect to finish its report until 30 September. Previous target date had been 30 June.

Cited as reasons: The complexity of the network probe—more difficult than expected—and the legal difficulties with the film packagers.

The FCC proposes to consider on a case-by-case basis all requests for an increase in power from 250 watts to 1,000 watts by class IV fulltime stations.

The radio stations contend they're at a competitive disadvantage vis-a-vis the 1,000-watt daytime-only outlets.

GETTING THE MOST FROM

If the Picture "Pops"
It Has What It Takes!

Many a good film commercial has been ruined by a poor presentation "on-air." If the picture "pops" out at you, has sparkle and dimension, you know it's good. With modern RCA Film Equipment you can expect and get the highest quality reproduction and long term reliability in operation.

P.S.
HOW LONG SINCE
YOUR STATION'S
FILM ROOM
WAS MODERNIZED?

YOUR FILM DOLLAR

How to Get the Kind of Picture Quality that Advertisers Want

There are two ways to increase the quality of your film programs:

- (a) By using Vidicon film cameras
- (b) By using professional projectors.

Vidicon cameras give you sharp, clear, virtually noise-free pictures of live picture quality. The Vidicon will show every detail that is on the film. For example, night scenes are much clearer with new Vidicon cameras than with older Iconoscope equipment. Vidicon film cameras have *ideal* tone or gray scale range for high quality reproduction of film. A remote light control permits the RCA Vidicon camera to be adjusted to optimum operating conditions at all times.

Professional RCA projectors are another requirement for high picture quality. Professional film projectors provide a rock-steady picture, free from jump and jitter, as well as high fidelity sound. Precise optics in the RCA film and slide projectors assure evenness of illumination and excellent resolution.

Whether you are a station executive, program sponsor or agency man, you'll be helping the cause of good film programming by advocating the use of up-to-date film room equipment. Ask the RCA Broadcast Representative to show you our new film manual "Planning TV Film Facilities for Color and Monochrome."

Clothiers report that advertising fellows have become so sensitive to the gray flannel tag that the swing is to brown pastels.

Added fashion note: The "sincere" tie is being replaced by simple plaids.

Here's an idea for a promotional window streamer for products advertised on tv: Excerpts from a storyboard.

Identification with something they see on tv should garner high readership—a sort of "Imagery Transfer."

Chalk up as the ultimate in frustration the plight of a Madison Avenue agency which recently was awarded a \$5-million-plus account.

It found that the prior agency had rushed through a summer network film series and other items—all out of the 1957 budget.

So when the new agency moved in, it—like Mother Hubbard—found the cupboard bare.

Unlike other trade associations, the 4 A's prefers to keep its roster of board and committee members quiet.

This reluctance stems from a suspicion that too many names wind up on "sucker" lists.

Madison Avenue toilers in the tv vineyard are working up a slow burn over the publicity antics of script writers.

It's outrageous, they say, the way the writers pause on their way to the bank with \$7,500-a-week salary checks to complain to newspaper columnists about the low state of air programing.

Confectionery wholesalers would thank M&M Candy to lay off that no-melt-ing-in-the-hand commercial for the summer.

Distributors gripe that the sight of messy palms tends to make the consumer conscious of what the warm season might do to chocolate-covered goodies. They think it's bad for everybody.

If, on a trip, you've tuned your car radio to a smalltown station and wondered how it was able to snare so many local merchants, the odds are that a crew of high-pressure contest promoters has been working the area.

These promoters refer to the time packages they sell as "promotional advertising," and their main gimmick is some form contest—often an air version of bingo.

There are about 30 such groups operating out of New York. Their estimated annual gross is \$20-25 million.

The goal is 100 26-week contracts in an area. The net for the station is 25% on each deal—plus the prospects of salvaging some of the merchants as future advertisers.

FORGING THE SILVER LINK IN OUR CHAIN OF YEARS!

Yesterday the properties of our existence were essentially the same as they had been for over a decade. The microphone, the transmitter, the talent, the programming . . . everything was there as always before. Only their size and shapes and scope had been changed over the years. And yet, at the stroke of an hour, all of this passed into a new era at CKLW. The silver year of our first quarter century of broadcasting service to this region arrived this month. We greet this milestone with the mixed emotions of youth, yet with a solemn pledge for the continuation of the causes, the virtues that have been responsible for this station's growth. Our great pride in fashioning this man-made chain of business events in such a successful manner is best exemplified by the blacksmith who hand-fashioned; determined always to create a finer product. Today, we pledge again to stay eternally young, and search always for new and modern ways to be of advantage to your promotion program.

RATE THE REPS

(Continued from page 34)

be questioned. A written review is reasonable if they feel they've got a case for future planning. A business-like letter (no whining, no sarcasm) is likely to get full consideration.

"5. This is as important as the first point mentioned. Reps should provide (a) clear-cut avail forms; (b) ratings info as and if requested; (c) data sheets as and if requested or a covering letter.

"We get tired of doing the rep's work and many a good buy gets overlooked in log-jam typing jobs or verbal scratch pad notes. Occasionally in the interests of time this can't be avoided. But usually it can."

Another lady buyer, this one from New York, spelled out as part of her comment a useful review of what should go into an availability list. She said:

"When avails are given, provide enough information so that repeated calls are not necessary. Following are some things that should be part of every avail list:

"Market; station; affiliation; channel (tv); power and frequency (am); adjacencies and, if local personality, a short blurb about the person and type of show; current market data; type of promotion if schedule warrants same; special packages if station has same and they are not shown in rate book."

A former timebuyer in New York, now a media executive, provided this view of rep-buyer relations which will be of interest to agency management:

"Many times short campaigns are over before confirmations of schedules are received. Too many reps confirm one or more weeks later. And spots are substituted on the confirmation without the knowledge of the buyer.

"The substitution of spots, coupled with the late confirmation, causes duplicate work in the estimating and typing groups. With clerical costs rising, it is imperative that information (particularly rate breakdowns on packages) be received from the rep accurately and quickly.

"The reps should standardize the availability and confirmation forms and the method of reporting the information. It will save time and effort on the part of buyers and estimators.

"Late confirmations and spot substitutions, by the way, lead to another complication: Discrepancies on the station bills. Discrepancies cause more

WREX-TV

REIGNS SUPREME OVER A KING SIZE MARKET

A POPULATION of over one million . . . on estimated 305,921 TV households in grade A, B, and C coverage area where retail sales total close to one and a third billion dollars!

WREX-TV brings viewer-preferred CBS and ABC network programs to the great Illinois/Wisconsin market, outside the influence of Chicago and Milwaukee TV coverage.

THE ONLY VHF STATION SERVING THE ROCKFORD AREA

An estimated 43,545 households have television in Rockford area alone!

Survey after survey of 14 counties indicates uncontested dominance of Northern Illinois-Southern Wisconsin area by WREX-TV

Comparative 1/4 hour ratings:

WREX-TV (VHF) - - 440
Station "B" (UHF) - - - 0

Uncontested dominance of the Rockford area.

trouble, involve more work and worst of all are non-commissionable. If they were, we would not have to have clients. We could live on commissions from discrepancies."

A timebuyer in New York struck a note which was sounded frequently:

"The rep sells service. He has no plant, formulas or tangible goods. He is only as good as his salesmen and his properties (stations).

"Some reps have poor salesmen; others have good ones; others have some of each. The salesmen must supply service, no excuses. . . . I've never been called upon by a poor salesman from [Rep B]. They are all good. They provide service. They have research. They have good stations. They try to understand our problems as well as the stations. *Service, service, service!*"

The importance of the station's role in backing up the rep was mentioned by a number of buyers. A New York buyer (masculine handwriting) said:

"Much of rep service depends on the stations they represent. Some are more alert than others. Type of programing enters into the picture also. Stations with block programing, for instance, are easier to handle as far as availabilities are concerned."

Here are some short but important comments:

"Let the buyer make the decisions!"

"Be certain avails are still unsold when immediate purchase is made. Have competent secretaries should contact be out of office."

"Make more and briefer calls—even when agency isn't buying. Have all data at fingertips."

"More selling and less mere delivery of availabilities. The salesmen should have a plan to submit—a reason for buying his station. Most salesmen deliver avails and await a decision."

"Listen intelligently to the buyer when he describes the type of availabilities wanted."

"Make an honest and intelligent effort to specifically relate the properties you sell to the problems and aims of the clients we represent."

"Less discussion *after* decisions are made. More pre-sell."

"Prompt follow-up on all schedule changes (times, adjacencies, rate increases, preemptions, any mistakes such as competitive adjacencies, etc.). Keep visits to a minimum with or without station people."

Reps at work

Bob Kizer, television sales, Avery-Knodel, Inc., New York, says that "creative buying—calling for qualitative analysis of availabilities— isn't a lost art. Recently, well-armed with what I knew were superior ratings, I called on a timebuyer—and he refused flatly to look at my figures. They were of no value to him because of the changes in program structure which had taken place since the rating period. He realized that he had to make his buy on another basis—track records of audience composition, coverage and cost, and future program composition." This creative buyer, Bob points out, knows how important these factors are and takes advantage of the information well-prepared reps provide. "Nor does he minimize the ratings per se," Bob says. "He simply is aware that rating points can't answer his problem nor support his decision on their own. Even the particular characteristics of viewing habits in each individual market are of vital interest to him." With drastic changes in network and local program lineups, he notes, agency buyers are going to face up to the very same facts frequently. "Let's have more of this creative buying," says Bob.

Mort Bassett, John Blair & Co., New York, thinks that "spot radio's strongest media advantage is left unevaluated in far too many of today's media decisions. It is the *showmanship-salesmanship*-plus of the spot radio medium. Only spot radio can deliver literally hundreds of strong local personalities, the top caliber salesmen-showmen

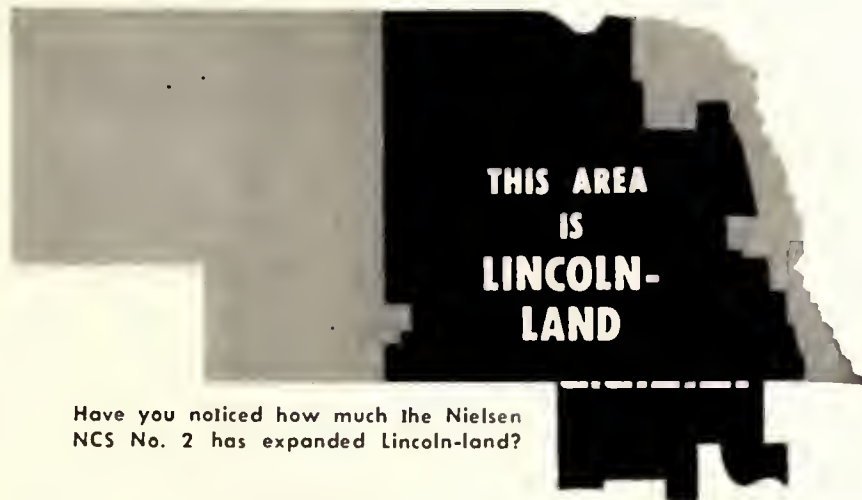

of their areas. Mort points out that as showmen, spot radio's local personalities create a familiar, friendly program climate that fits the local scene. Their sales messages are endowed with greater importance, warmth and sincerity. These are the features which sell the advertiser's product—and no other medium can offer them with the same impact. "The important thing to remember about spot radio is that it's basically a *sound*

advertising medium. It's a *selling sound*. You can't measure its effectiveness with a slide rule, but you can gauge its full sales power—if you'll analyze its terrific sales record in conjunction with listening to the actual sound of its local personalities. Your rep salesmen have the proof that spot radio is a *sound* advertising medium for your product with a solid history of success stories behind it."

ARE YOU HALF-COVERED IN NEBRASKA'S OTHER BIG MARKET?

Have you noticed how much the Nielsen NCS No. 2 has expanded Lincoln-land?

MAY 1957 VIDEODEX PROVES KOLN-TV SUPERIORITY!

The May 1957 Videodex covered all TV homes in 42 counties in South Central Nebraska and Northern Kansas. The ratings speak for themselves:

SUMMARY—AVERAGE RATINGS, % TV HOMES

	KOLN-TV	Station B	Station C	Station D
Sign On—1:00 P.M.	10.1	5.1	4.8	3.5
1:00-5:00 P.M.	12.5	7.3	6.5	4.5
5:00-11:00 P.M.	22.3	12.0	9.5	6.2

Daytime and nighttime Sundays through Saturdays — KOLN-TV leads the second station by margins of 71% to 98%!

KOLN-TV covers Lincoln-Land, a rich 69 county market consisting of 296,200* families with 191,710* TV sets.

KOLN-TV is farther removed from Omaha than Hartford is from Providence . . . or South Bend is from Fort Wayne.

Latest ARB, Telepulse and Videodex surveys all show KOLN-TV dominates the Lincoln-Land audience.

Avery-Knodel has all the facts on KOLN-TV, the Official CBS Outlet for South Central Nebraska and Northern Kansas.

Tv and radio NEWSMAKERS

Thomas C. Harrison, new vice president in charge of sales for ABC Radio, is a station-level recruit coming from the St. Louis office of John Blair & Co. Harrison headed up the St. Louis operation for the station rep firm for two and a half years. Prior to that he was national sales manager of WSM, Nashville. His earlier background includes acting as sales representative for Ralston Purina Co. covering five Southeastern states starting in 1946; in 1947 he became assistant football coach at Vanderbilt University and took over the same post at UCLA in 1949. Harrison then joined Brown Radio Productions, Nashville, in 1951 as sales manager of transcribed shows. He left Brown in 1952 to join WMS. In another recent appointment ABC TV has promoted Eugene C. Wyatt to the post of national sales manager.

Walter M. Koessler has been named station manager of WPST-TV, Miami. The appointment was announced this week by G. T. Baker, president. WPST-TV, which has just completed contract negotiations with ABC TV, will go on the air as a primary affiliate of that network on 1 August. The new station is owned and operated by Public Service Television, Inc., a wholly owned subsidiary of National Airlines, Inc. As the new station manager, Koessler brings with him a background of 22 years experience in both radio and television. He was most recently managing director of WGBS-TV, Miami. This is a post he has held for the past three years. Before coming to Florida, Koessler served as general manager of WROK-TV in Rockford, Ill. He was connected with the Rockford station in various capacities for about 18 years.

Sam B. Schneider, local station marketing specialist, has been appointed Midwest manager of SPONSOR. Schneider comes directly from KVOO-AM&TV, Tulsa, where he spent 17 of his 21 years in the broadcasting industry. His most recent posts were that of secretary of the two corporations and head of marketing. He has developed an international reputation as a speaker on trends and training in the fields of marketing and management. He is listed on the National Sales Executive Clubs, Canadian Sales and Advertising and National Management Ass'n speakers' roster, a past president of NATRFD and headed a team for the Mutual Security Agency to help rebuild radio-tv in Europe. A journalism degree and MA in economics-marketing fit him well for SPONSOR's marketing concept with local stations.

SPONSOR SPEAKS

Tv and Radio Basics

SPONSOR's Fall Facts Basics have been in business for 10 years. During this decade this annual edition, published each July, has carefully recorded the facts, figures and trends of an ever changing industry and they have been gratefully received by agency and advertiser broadcast buyers everywhere.

In its 11th year Fall Facts Basics will become known as Tv and Radio Basics. The reasons for the name change are simple. Many on the buying end of the business have told us that the "Fall Facts" designation is too limited—that they find the book handy and useful from one July to the next. Furthermore, the popularity of such sections as Tv Basics, Radio Basics, Film Basics, Color Basics and other industry guideposts draw us inevitably to the new name.

So when July rolls around and you spot Tv and Radio Basics in the morning's mail just remember that it's an old friend—and a mighty basic one to boot.

"Ratings week" progress

Back in May when SPONSOR urged the research services to end the "ratings week" problem, we anticipated it might take many months to find a solution (see editorial 18 May).

But progress came rapidly. Last week American Research Bureau announced two new plans designed to discourage special programming and promotion during ratings week.

ARB, under Plan 1, keeps ratings week secret.

Under Plan 2, ARB conducts its study during four weeks of the month, then prints the 1-week ratings plus a 4-week average rating. Thus if the 1-week rating is unusually high, there's a tip-off that the station may have tried to tilt the scales.

Both ARB plans strike us as important steps toward ending a situation in which some stations have endangered the believability of ratings for all stations.

Pulse, too, has moved to help end the problem by asking subscribers to report unusual activity during ratings week. This report is then entered in the ratings book itself.

The next move is up to the stations. By cooperating with the rating services they can benefit the entire industry and restore confidence of buyers—especially in the validity of some feature film ratings.

THIS WE FIGHT FOR: Keep your eye on nighttime radio. The tide is beginning to turn away from today's imbalance to use of radio around the clock. Don't get left out. Best time slots go to clients and agencies moving in first.

10-SECOND SPOTS

Electronic age: George E. Blechta, v.p. of A. C. Nielsen Co., told a meeting of Maryland-D.C. Broadcasters of eventual possibility of electronic meters in station managers' offices that will give a second-by-second index on the size of the radio or tv audience. *That's how it goes—first instant coffee, next instant ratings.*

Heat wave: During the sizzling summer days on Madison Avenue it has been noted that everyone—even network salesmen—are reluctant to call at offices that aren't air conditioned. *Have gray flannel suit, will travel—but only in air conditioned circles.*

Off goes on: S. C. Johnson & Sons begin a radio campaign this month on Mutual for its new insect repellent called "Off." *Should have some interesting copy possibilities—"The next time you picnic on an ant hill, get Off!"*

Mysterious East: A Helene Curtis Industries ad exec, on a swing through the Hawaiian Islands, sent back the following cable: "Oahu today, gone to Maui."

Good deal: A new survey by the consumer panel of J. Walter Thompson for the Assoc. of American Playing Card Manufacturers reveals that "Tv homes play cards more than non-tv homes, by several percentage points." *These tv owners, they find time for everything.*

High pressure: Bird & Son, Massachusetts building materials manufacturer, offered a free roof to 10 lucky listeners to the CBS TV *Garry Moore Show*. More than 100,000 requests for a free roof poured in, among which was this letter: "How badly we need it! I'd sure advertise it in our local newspaper, plus I am president of the Home Demonstration Club, belong to the Womens Club, Garden Club, Moose Club, Church Guild, PTA and am leader of the Girl Scouts . . . so if I am lucky enough to get a roof, you sure would get advertised." *When an amateur moves into promotion, the pros better take cover.*

Phew! Lenthéric has just brought out a ball-point pen the ink of which is loaded with Tweed perfume. *Once those "perfumed pen letters" get circulating, watch for a pick-up in husband-wife conversation.*

WRCV IS #1 IN PHILADELPHIA!

TAKE IT FROM NIELSEN...

Sunday through Saturday, 6 a.m. to midnight, WRCV Radio averages 20.4% share-of-audience—first in Philadelphia!

WRCV takes the play away from 16 rival stations through a program pattern that carefully balances established NBC Network shows with popular, *selling* local personalities... like Bill Mayer in the morning, Vince Lee in the afternoon and Bob Benson at night.

You can sell on Philadelphia's #1 radio station at an interestingly low cost-per-thousand—especially with WRCV's economical 20-50 Announcement Saturation Plan. A letter, wire or telephone call will bring you all the details... *fast!*
